PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot RESTful APIs** supporting core financial operations, handling approximately 500 requests per second.
- Implemented **JPA and Hibernate** entities for data persistence, ensuring data integrity across multiple financial transaction processing modules.
- Authored **JUnit and Mockito tests** for complex Java components, increasing unit test coverage by 18% for critical backend services.
- Participated in the analysis of requirements and design documentation for new features within the financial services platform.
- Created and executed test scenarios and cases based on functional requirements, identifying defects early in the development cycle.
- Executed smoke tests on test environments to ensure readiness for comprehensive test cycles, supporting a **Windows Server / IIS / .NET** application estate.
- Containerised backend services using **Docker** and deployed them to **AWS EC2** instances, managing configurations via Jenkins pipelines.

SKILLS

Languages – Java, Python, SQL, R, DAX

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Databases – PostgreSQL, MySQL, Oracle, SQL Server

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Jira, Confluence, Kubernetes

BI & Analytics – Power BI, Tableau, Power Query, Data Modelling, Data Warehousing

Testing Tools – Postman, REST Assured, Selenium, Playwright, Jira

Domain – Financial Services, Wealth Management, Investment Services, Payments Operations, Transaction Monitoring, Regulatory Compliance

PROJECTS

Financial Transaction Monitoring Dashboard

- Engineered a **Java Spring Boot** application to ingest and process transaction data streams for real-time monitoring.
- Developed **JPA and Hibernate** mappings to store and retrieve transaction details from a **PostgreSQL** database, supporting reconciliation workflows.
- Created comprehensive unit and integration tests using **JUnit and Mockito**, achieving over 90% code coverage for the core processing logic.

Automated Test Case Generation Framework

- Designed and implemented a Python-based framework to automatically generate test cases from requirements specifications stored in **Jira**.
- Integrated with the **Jira API** to parse requirements and generate detailed test scenarios and test cases, reducing manual effort by approximately 40%.
- Developed validation scripts using **Python** to ensure the generated test cases accurately reflected the intended functionality and covered edge cases.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
