PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented CI/CD pipelines using **GitHub Actions** and **Jenkins**, automating build, test, and deployment processes for cloud-native applications, reducing manual deployment time by **40%**.
- Developed and maintained **Infrastructure as Code** using **Terraform** for provisioning and managing cloud resources on **Microsoft Azure**, ensuring consistent and repeatable environment configurations.
- Supported **Kubernetes** cluster operations, including managing deployments via **Helm** charts and troubleshooting pod-level issues, contributing to the stability of containerized applications.
- Managed artifact repositories using **JFrog Artifactory**, ensuring efficient storage, versioning, and retrieval of build artifacts for various projects.
- Implemented secure delivery practices by integrating **SSO** solutions and conducting regular **security scanning** within the CI/CD pipeline to mitigate vulnerabilities.
- Collaborated with software engineers and architects to integrate new services into the platform, troubleshoot build failures, and resolve environment-specific issues.
- Authored and updated operational documentation and **runbooks** for common deployment and troubleshooting scenarios, improving team knowledge sharing and incident response times.

SKILLS

CI/CD & Automation – GitHub Actions, Jenkins, TeamCity, Azure DevOps, Terraform, Helm, ArgoCD, Git

Cloud Platforms – Microsoft Azure, Azure Portal, AWS (EC2, S3, Lambda, CloudWatch)

Containerization & Orchestration – Kubernetes, Docker

Artifact Management – JFrog Artifactory

Security & Practices – SSO, Access Management, Security Scanning, Infrastructure as Code

Scripting & Languages – Python, Bash, Java, Spring Boot

PROJECTS

Azure Cloud Platform Modernization

- Engineered **Infrastructure as Code** using **Terraform** to provision and manage Azure resources, including AKS clusters, VNet configurations, and storage accounts, for a new microservices platform.
- Developed and maintained **CI/CD pipelines** in **Azure DevOps** to automate the deployment of containerized applications to **Kubernetes** (AKS), incorporating automated testing and rollback strategies.
- Implemented monitoring and alerting using **Azure Monitor** and **Log Analytics**, providing visibility into application performance and infrastructure health for the platform engineering team.

Containerized Application Deployment Automation

- Built reusable **Helm charts** for deploying various microservices onto a shared **Kubernetes** cluster, standardizing deployment configurations and simplifying the release process.
- Integrated **Jenkins** pipelines to build Docker images, push them to **JFrog Artifactory**, and trigger deployments to the development Kubernetes environment, enabling faster iteration cycles.
- Authored shell scripts for automating common environment setup tasks and log aggregation, improving the efficiency of troubleshooting build and deployment issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
