PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Collaborated with clients to gather detailed business requirements for software solutions, translating complex needs into actionable specifications for development teams.
- Assisted clients in understanding existing codebases and system configurations to map current workflows and identify areas for technical improvement.
- Documented intricate business processes and technical system interactions, creating clear process maps and functional specifications for development and client review.
- Utilized AI-assisted tools like **Cursor** and **Claude Code** for code comprehension and requirement analysis, accelerating research and problem-solving.
- Managed project timelines and commitments, proactively communicating any deviations from planned delivery dates to stakeholders.
- Engaged in client-facing calls to understand business challenges and present technical findings, ensuring alignment between client expectations and development efforts.
- Read and reasoned about existing codebases to understand system logic and dependencies, facilitating technical investigation without direct production code development.

SKILLS

Consulting Skills – Requirements Gathering, Process Mapping, Stakeholder Communication, Technical Documentation, Client Engagement, Problem Solving

AI Tools – Cursor, Claude Code, GitHub Copilot

Development Concepts – Codebase Analysis, System Understanding, API Documentation, Testing Endpoints

Data Analysis – SQL, Data Investigation, Dataset Comprehension

Project Management – Estimation, Commitment Management, Deadline Reliability, Proactive Communication

Business Domains – Ecommerce Platforms, Retail Operations, Order Management, Inventory Management

PROJECTS

Client Integration Analysis for Retail Platform

- Analyzed existing **Shopify** store configurations and custom integrations for a retail client to identify bottlenecks in their order fulfillment workflow.
- Mapped out data flows between the e-commerce platform and their inventory management system, documenting API interactions and potential points of failure.
- Provided a detailed report with recommendations for improving data synchronization accuracy and reducing manual reconciliation efforts, leading to a **15% reduction** in processing errors.

Technical Discovery for E-commerce Feature Enhancement

- Investigated the technical feasibility of a new customer-facing feature for an e-commerce website by examining the existing codebase and relevant third-party API documentation.
- Wrote **SQL** queries against staging databases to extract sample data and validate assumptions about data availability for the proposed feature.
- Documented findings on system limitations and potential integration challenges, enabling the client to make informed decisions about project scope and timelines.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
