PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed and enhanced a suite of **CI/CD pipelines** using **GitLab CI**, resolving execution failures and automating remediation for common issues across a distributed development environment.
- Developed and maintained **Python scripts** for automating data extraction, transformation, and loading (ETL) processes, improving data refresh cycles for operational reporting.
- Provided production support for enterprise applications, responding to P1/P2 incidents and performing root-cause analysis to implement long-term fixes, ensuring adherence to service level agreements.
- Collaborated with quantitative researchers and traders to troubleshoot and resolve production incidents and change requests within defined SLAs, performing root-cause analysis and implementing preventative measures.
- Maintained and improved a large, distributed set of **CI/CD pipelines**, monitoring pipeline health, investigating execution failures, and driving remediation efforts.
- Updated and maintained toolchains, build dependencies, and related infrastructure, applying retention policies across relevant systems and environments to ensure data compliance.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits and network settings for predictable environments.

SKILLS

Languages – Python, Java, SQL, Bash, PowerShell

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, GitLab, Kubernetes, Apache Airflow

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, TeamCity, Octopus Deploy, Conda

Methodologies – Agile, Scrum

Domain – Quantitative Trading Systems, Production Stability, CI/CD Reliability, Data Orchestration, System Operations

PROJECTS

Automated Deployment Pipeline for Trading Tools

- Engineered an automated deployment pipeline using **GitLab CI** and **Docker** to streamline the release process for quantitative research tools, reducing manual intervention by approximately 60%.
- Integrated **Apache Airflow** for orchestrating complex data processing workflows and scheduled reporting jobs, ensuring reliable data retrieval and transformation for downstream analysis.
- Developed reusable pipeline templates and scripts in **Python** to support new project requirements, enabling faster iteration and deployment of trading system components.

Production Incident Management and Root Cause Analysis

- Designed and implemented enhanced monitoring dashboards in **Splunk** to provide real-time visibility into application performance and identify potential issues before they impacted production.
- Conducted detailed root-cause analysis for critical production incidents on enterprise Java applications, documenting findings and recommending structural improvements to prevent recurrence.
- Collaborated with cross-functional operations teams to refine incident response procedures and ensure timely resolution, maintaining adherence to strict SLAs for critical financial systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
