PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Administered and maintained critical ICT application systems, ensuring stability and reliability for hospital operations, directly supporting the **ICT Applications Portfolio Management Team**.
- Troubleshoot and resolved application issues through detailed log analysis and system monitoring using tools like **Splunk** and **Dynatrace**, managing incident response and SLA adherence for enterprise systems.
- Collaborated with external suppliers to troubleshoot complex technical issues, review proposed application changes, and conduct user acceptance testing before deployment into production environments.
- Managed application configurations and coordinated system updates through formal **change management** processes, ensuring smooth transitions and post-go-live support across interconnected platforms.
- Developed automation scripts in **Python** to streamline data processing tasks and generate scheduled reports, improving operational efficiency for business analysts and support teams.
- Performed regular data validation and ad-hoc querying using **SQL** across PostgreSQL and Oracle databases, supporting data integrity checks and system integration efforts.
- Containerised Java Spring Boot applications using **Docker** for consistent deployment across development and production environments on AWS EC2 instances.

SKILLS

Application Support – Issue Troubleshooting, Application Administration, Configuration, Change Management, ITIL Principles, Incident Response, SLA Management

Core Technologies – Java, Spring Boot, Python, SQL, Docker, Linux, Git, Jenkins

Database Systems – PostgreSQL, MySQL, Oracle

Monitoring & Logging – Splunk, Dynatrace, CloudWatch

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

PROJECTS

Hospital Application Support & Reporting Dashboard

- Developed a **Power BI** dashboard to provide real-time operational insights into application support ticket volumes and resolution times, enabling the ICT Applications Portfolio Manager to track team performance.
- Integrated data from the **Jira Service Desk** ticketing system using **Power Query** to consolidate information, creating custom DAX measures for key performance indicators such as average response time and first-contact resolution rate.
- Automated data extraction and transformation processes using **Python** scripts, reducing manual reporting effort by approximately 6 hours per week for the support team.

Enterprise System Integration & Automation

- Designed and implemented REST APIs using **Java Spring Boot** to facilitate data exchange between an internal ERP system and a client-facing operational platform, improving data synchronization accuracy.
- Automated routine data reconciliation tasks between PostgreSQL and Oracle databases using **Python** scripts, which processed approximately 1,500 records daily and reduced manual reconciliation errors by an estimated 15%.
- Managed application configurations and coordinated system updates for integrated enterprise systems, ensuring adherence to change control policies and facilitating seamless UAT cycles.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
