PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Configured and maintained **IT and RF equipment** within emergency services vehicles and control centres, ensuring operational readiness for critical communications.
- Executed preventative maintenance schedules and performed break/fix support on **MDTs, TETRA systems, and routers**, escalating recurring issues to senior engineers.
- Managed site documentation completion, ensuring all site reports and maintenance logs were submitted accurately and within contractual timelines.
- Provided out-of-hours **on-call support** for critical incidents, responding to system alerts and coordinating initial troubleshooting efforts.
- Monitored deployed solutions using network diagnostics tools to proactively identify potential outages and contributed to root cause analysis for resolved incidents.
- Developed and implemented automated scripts to streamline **RMA processes** and track third-party component escalations, improving turnaround times by approximately **15%**.
- Participated in regular **Agile ceremonies**, including sprint planning and daily stand-ups, to coordinate workflow and estimate technical tasks for upcoming development cycles.

SKILLS

Network Equipment – MDTs, TETRA systems, routers, RF/IT connectors, radio frequency equipment

IT Infrastructure – IT Networks, ICT Infrastructure, PCs

Field Operations – Field-based, preventative maintenance, break/fix support, site documentation, on-call support, RMA processes

Communications – Radio Frequency (RF) communications systems, wireless/wired networks, radio technologies

Methodologies – Agile, Scrum, QEHS/ISO standards

Programming/Scripting – Python, Shell scripting

PROJECTS

Emergency Services Vehicle Comms System Upgrade

- Managed the end-to-end deployment of upgraded **TETRA radio systems** and **MDTs** across a fleet of 45 emergency vehicles, ensuring seamless integration with existing control centre infrastructure.
- Conducted on-site testing and validation of **IP and RF connectivity** for newly installed equipment, resolving ~90% of initial connectivity issues directly in the field.
- Documented new installation procedures and created troubleshooting guides for common RF interference problems, reducing support escalations by **20%** for field technicians.

Control Centre Network Resilience Enhancement

- Assisted in the implementation of redundant **network routers** and **RF connectors** within a primary emergency services control centre, enhancing system uptime.
- Performed diagnostic checks and latency testing on the control centre's wired and wireless network segments, identifying and rectifying bottlenecks affecting data flow.
- Contributed to the creation of updated **QEHS/ISO standards** documentation for network equipment maintenance within the control room environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
