PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Python scripts** to automate the ingestion and transformation of log data, reducing manual processing time for the operations team by approximately **40%**.
- Developed and maintained **Java Spring Boot REST APIs** for internal services, focusing on clear contracts and efficient data exchange.
- Managed production incidents for enterprise applications, performing root cause analysis using **Splunk** and **Dynatrace**, and coordinating P1/P2 responses to meet SLA targets.
- Built **AI-assisted triage tooling** that pre-classifies incoming bug bounty reports, flagging duplicates and routing valid issues with reproduction context to engineering teams.
- Developed **investigation tooling** using LLM-backed copilots and Slack bots to aggregate alert context from SIEM data, correlating signals to surface critical security events.
- Configured and tuned **SIEM and EDR tools** to improve detection coverage, enriching alerts with contextual data to streamline incident response workflows.
- Containerized services using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring consistent environments.

SKILLS

Security Operations – Vulnerability Management, Threat Response, Incident Response, Bug Bounty Triage, SIEM, EDR, DLP, Detection Engineering, Darkweb Monitoring

AI/ML & Automation – LLM Agents, Prompt Engineering, RAG, OpenAI, Python, Bash Scripting, Automation Tooling

Backend Development – Java, Spring Boot, REST APIs, Python, FastAPI, Flask

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Jenkins, Git

Databases & Data Handling – SQL, PostgreSQL, MySQL, Oracle, Data Pipelines, ETL

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, Log Analysis

PROJECTS

Security Alert Correlation Engine

- Developed a Python application to ingest security alerts from multiple sources (SIEM, EDR), correlating events based on common indicators to reduce alert noise for the SecOps team.
- Integrated an LLM-based summarization module to provide context and potential impact assessments for high-priority correlated alerts, reducing investigation time by an estimated **30%**.
- Built a Slack bot interface that surfaces correlated alerts and summaries directly to the on-call security engineer, facilitating faster initial triage.

Automated Vulnerability Triage Pipeline

- Engineered a Python pipeline to automate the initial triage of incoming vulnerability reports from bug bounty platforms, performing automated checks for duplicates and known false positives.
- Implemented prompt engineering techniques to leverage an LLM for pre-classifying report severity and suggesting relevant engineering teams for valid findings.
- Designed the pipeline to generate standardized reproduction steps and attach relevant logs, improving the handover process to the security engineering team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
