PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices for core **payments pricing** features, integrating with **DynamoDB** persistence and **Apache Pulsar** messaging.
- Engineered **Hibernate** entities and optimized **JPA** queries to manage complex pricing rules, reducing data retrieval times by **18%** for financial transaction processing.
- Developed robust **Java** backend services adhering to OOP principles, including comprehensive **JUnit** test coverage and effective use of **Mockito** for dependency simulation.
- Participated in **agile ceremonies**, providing technical estimations for new feature development and conducting thorough **code reviews** for junior engineers.
- Collaborated with product managers to translate business requirements into technical solutions for the **payments processing platform**, ensuring alignment with team goals.
- Integrated new **Kotlin**-based microservices into the existing Java ecosystem, focusing on seamless data exchange and maintaining backward compatibility.
- Containerized backend services using **Docker** and deployed them to **AWS ECS**, configuring networking and resource limits for stable operation.

SKILLS

Languages – Java, Kotlin, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, Apache Camel, Apache Pulsar, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch, ECS), Docker, Jenkins, Git

Databases – DynamoDB, PostgreSQL, MySQL, Oracle

Frontend – React

Tools & Methodologies – Agile, Scrum, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Java Payments Pricing Engine Enhancement

- Developed a new **Java Spring Boot** module to handle dynamic pricing adjustments for credit card transactions, processing up to **5,000** requests per minute.
- Integrated the pricing engine with **DynamoDB** for persistent storage of pricing rules and historical transaction data, ensuring data integrity.
- Wrote comprehensive integration tests using **JUnit** to validate the accuracy of pricing calculations against defined business logic.

Real-time Transaction Data Pipeline

- Built a **Python**-based ETL pipeline to ingest and transform real-time financial transaction data from multiple sources into a data warehouse.
- Implemented data validation and cleansing routines using **pandas**, reducing data quality issues by **22%** before loading into downstream systems.
- Scheduled and monitored pipeline execution using **Jenkins**, ensuring timely availability of data for reporting and analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
