PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented core banking product logic, including **account management**, **fee structures**, and **interest calculations**, using a rules-based contract approach.
- Built and maintained **ledger-posting logic** that ensured accuracy, auditability, and idempotency, aligning with established accounting principles for financial transactions.
- Developed integration services and **REST APIs** to connect core banking systems with downstream channels like payments, CRM, and general ledger systems.
- Wrote comprehensive **unit and integration tests** for financial logic, covering edge cases and implementing reconciliation scenarios to ensure data integrity.
- Collaborated with Product Owners and Subject Matter Experts to translate complex **banking requirements** into actionable technical designs and implementable features.
- Troubleshoot and resolved **production issues** impacting core banking operations, focusing on root-cause analysis to improve system stability and enhance operational runbooks.
- Containerized core banking services using **Docker** and deployed them to a cloud-native platform, managing configurations and resource allocation on **AWS EC2** instances.

SKILLS

Core Banking Platforms – Thought Machine Vault (comparable ledger engines), Accounts, Deposits, Lending, Fees, Interest, Limits, Delinquency, Posting Rules, Lifecycle States, Financial Events, Interest Accrual, Compounding, Billing Cycles, Statement Generation.

Integration & APIs – REST APIs, Integration Services, Event-Driven Integrations, Pub/Sub, Streaming, Error Handling, Retries, Reconciliation, Observability.

Development Languages & Frameworks – Java, Spring Boot, Python, SQL.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Jenkins, Git.

Financial Concepts – Double-entry accounting, Ledgers, Postings, Balances, Reconciliation, Regulatory Reporting, Audit Trails, Controls, Model Governance.

Testing & Quality – Unit Testing, Integration Testing, Contract Testing, Test Automation, Golden Datasets, Simulation Testing.

PROJECTS

Core Banking Ledger Implementation (HCL Technologies)

- Engineered a Java Spring Boot service to manage account lifecycle states, handling transitions from onboarding through to closure, impacting **thousands of customer accounts**.
- Implemented configurable **posting rules** for transaction processing, ensuring that all financial entries adhered to double-entry accounting principles and were logged for audit.
- Developed a reconciliation module that compared ledger balances against transaction logs daily, identifying and flagging discrepancies for investigation, **reducing manual reconciliation effort by 40%**.

Financial Operations API Gateway (HCL Technologies)

- Designed and built a **Java REST API** gateway to centralize access to core banking services, processing approximately **1,500 requests per hour**.
- Integrated with an upstream **payments processing** system to facilitate transaction status updates and error reporting to operations teams.
- Implemented robust error handling and logging using **Spring Boot Actuator** and **Splunk**, improving system observability for incident response.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
