PROJECTS

Sales Automation Workflow Enhancement (HCL Technologies)

- Developed a **Python**-based ETL pipeline to ingest and standardize lead data from multiple external sources into the internal CRM, improving data accuracy by **22%**.
- Built **RESTful APIs** using **Flask** to expose lead enrichment services, allowing downstream sales tools to retrieve up-to-date prospect information.
- Created automated reporting dashboards using **Power BI** to track lead velocity and identify conversion funnel inefficiencies for the sales operations team.

Customer Data Integration Platform (HCL Technologies)

- Engineered **Java Spring Boot** microservices to handle data synchronization between the core financial platform and partner systems via **REST**.
- Implemented data validation and error handling logic with **JPA** and **PostgreSQL** to ensure data integrity across integrated systems, reducing data discrepancy incidents by **15%**.
- Managed configuration changes and performed UAT coordination for system updates, ensuring smooth post-implementation transitions for operational teams.
