PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production incident response for enterprise Java/.NET applications, adhering to strict SLAs and coordinating P1/P2 issue resolution using **Splunk** and **Dynatrace**.
- Automated key operational tasks and data processing workflows using **Python scripting**, including ETL processes and scheduled reporting generation.
- Developed and maintained **Java Spring Boot** REST APIs for new features and bug fixes within existing microservices.
- Implemented and supported CI/CD pipelines for software promotion and operational gating, contributing to efficient release cycles.
- Configured **NGINX** and managed **gRPC** event-driven architectures to ensure seamless integration and data flow for gateway products.
- Ensured system availability, capacity, and performance through embedded monitoring and self-healing capabilities, aligning with SRE principles.
- Implemented **Ansible** playbooks and **XLR templates** for automating certificate renewal, traffic routing, and compliance reporting.

SKILLS

DevOps/SRE – Site Reliability Engineering (SRE), NGINX, gRPC, Ansible, XLR, Chef, Jenkins, Groovy, shell scripting, Bitbucket, Git, Venafi

Cloud – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes

Programming Languages – Java, Spring Boot, Python, SQL, R

Databases – PostgreSQL, MySQL, Oracle

Monitoring & Logging – Splunk, Dynatrace, CloudWatch

Security & Compliance – PCI compliance, ITSM, Certificate Lifecycle Management, Mutual TLS, SSL, SSH, Encryption

Networking – L1-L7 Network Layers, Load Balancers (BIG-IP F5), Application Firewalls

PROJECTS

Production Gateway Service Automation

- Developed Python scripts to automate the renewal of SSL certificates for production gateway services, integrating with **Venafi** for secure certificate management.
- Engineered **Ansible** playbooks to deploy configuration updates to NGINX instances, ensuring consistent and compliant traffic routing across diverse environments.
- Implemented automated health checks and alerting mechanisms using **Splunk**, reducing manual monitoring overhead by 40% for critical gateway components.

SRE Toolkit for Application Resilience

- Built a suite of **Python** scripts to analyze application logs and generate incident reports, providing actionable insights for root cause analysis and MTTR reduction.
- Created automated deployment pipelines using **Jenkins** and **Docker** for staging and production environments, facilitating faster and more reliable software releases.
- Designed and implemented proactive monitoring dashboards in **Dynatrace** to track key SRE metrics, enabling early detection of potential performance degradations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
