PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for core business services, handling approximately 1,500 requests per minute.
- Implemented and managed persistence layers using **Hibernate** and JPA for enterprise applications, ensuring efficient data retrieval and updates across relational databases.
- Authored **JUnit** test suites and utilized **Mockito** for unit and integration testing of Java components, achieving over 90% code coverage for critical modules.
- Designed and implemented routing, validation, and transformation logic for **API Gateway services**, managing high volumes of traffic for integrations.
- Contributed to the development of highly scalable and resilient **distributed systems** using Scala and Akka Streams, focusing on asynchronous processing.
- Diagnosed and resolved production issues in a distributed systems environment, including participation in an on-call rotation to ensure service reliability.
- Containerized microservices using **Docker** and deployed them to an **AWS EKS** cluster, configuring basic resource limits and networking rules.

SKILLS

Languages – Scala, Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, Akka HTTP, Akka Streams, JUnit, Mockito, pandas, NumPy, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Concepts – Distributed Systems, API Gateways, Microservices, Object-Oriented Design, Agile Methodologies, Data Analytics, CI/CD

PROJECTS

Distributed Systems API Gateway Enhancement

- Enhanced an existing **API Gateway** service by implementing new routing rules and request validation logic using **Scala** and **Akka HTTP** to support expanding integration needs.
- Developed asynchronous data transformation modules within the gateway to handle diverse incoming request formats, reducing processing latency for specific transaction types by **18%**.
- Wrote comprehensive unit and integration tests for the new gateway components, ensuring seamless deployment and stable operation under simulated high-load conditions.

Java Persistence Layer Optimization

- Refactored the data access layer of a **Java Spring Boot** application, migrating from custom SQL queries to **Hibernate** and **JPA** for improved maintainability and type safety.
- Implemented strategic indexing and query optimization techniques on the **PostgreSQL** database, decreasing average query execution time for core reporting functions by **30%**.
- Created a comprehensive set of **JUnit** tests to validate data integrity and CRUD operations, ensuring a smooth transition to the new ORM implementation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
