PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Rust services** for AI data training, focusing on correctness, logic, and idiomatic Rust patterns, directly contributing to model improvement for large AI companies.
- Assessed AI-generated **Rust code** and explanations for accuracy, safety, and adherence to prompt requirements, identifying errors in ownership, borrowing, and lifetime management.
- Authored high-quality technical explanations and model solutions in **idiomatic Rust**, demonstrating clear reasoning and problem-solving capabilities.
- Evaluated and ranked multiple AI responses based on correctness and reasoning quality, providing expert feedback to enhance model performance and contextual relevance.
- Implemented **Python scripts** for data pipeline automation and scheduled reporting, supporting various enterprise systems.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, including SLA management and P1/P2 incident response.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, ensuring efficient resource utilization and scalability.

SKILLS

Languages – Rust, Python, Java, SQL, R, TypeScript

Rust Ecosystem – Tokio, Actix, Serde, async Rust, ownership, borrowing, lifetimes, traits, generics, pattern matching, error handling

AI/ML – AI Data Training, LLM evaluation, prompt engineering, model evaluation, scikit-learn, pandas, NumPy

Backend Development – Spring Boot, REST APIs, Microservices, FastAPI, Flask

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD

Databases – PostgreSQL, MySQL, Oracle

Observability & Support – Splunk, Dynatrace, PagerDuty, incident response, root cause analysis

PROJECTS

AI Code Review and Explanation Platform

- Engineered a Rust-based service to process and evaluate AI-generated code snippets and accompanying explanations, focusing on ownership and lifetime correctness.
- Developed prompt generation modules in Python to guide AI models in creating idiomatic Rust solutions for complex backend and systems programming tasks.
- Implemented an evaluation framework to assess model reasoning quality and identify potential algorithmic or concurrency errors, directly improving AI output accuracy.

Automated Data Validation Framework

- Built a Python CLI tool to automate data validation checks against defined schemas for enterprise reporting, reducing manual review time by approximately **40%**.
- Integrated the framework with Jenkins pipelines to provide immediate feedback on data quality during ETL processes, catching an average of **15 validation errors** per run.
- Designed and implemented data extraction and transformation logic using **pandas** and **SQL** to prepare datasets for downstream analytics.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
