

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Built and maintained Java Spring Boot backend services and RESTful APIs for high-availability banking and payments platforms, integrating relational databases and third-party systems for millions of transactions.
- Broke product requirements into clear technical tasks and delivered maintainable components within an established framework, collaborating with product, QA, and design stakeholders in Agile sprints.
- Designed API contracts and service integrations, tuning Oracle and MySQL queries and indexes to hold latency stable under heavy production load.
- Defined test strategies with unit and integration coverage and automated them in CI pipelines, cutting regression escapes and keeping releases consistently shippable.
- Troubleshoot live production issues end-to-end from metrics, logs, and user feedback using Splunk and Dynatrace, then engineered permanent fixes under strict SLAs.
- Managed Linux production servers and AWS resources (EC2, S3, CloudWatch) with Docker and Git-based CI/CD pipelines.
- Adopted AI-assisted development tools (LLM-based) for scaffolding, refactoring, test generation, and debugging — with strong validation and full ownership of all shipped code.

SKILLS

Languages – Java, Python, TypeScript / JavaScript, SQL, Bash.

Backend – Spring Boot, RESTful APIs, WebSockets, API design, JPA/Hibernate, microservices.

Frontend – React, Angular fundamentals, HTML/CSS.

Testing & Quality – Unit, integration & E2E testing, contract testing, test automation in CI pipelines.

AI-Assisted Development – LLM tools for scaffolding, refactoring, test generation, and debugging, with rigorous validation and code ownership.

DevOps – Git, Docker, CI/CD (GitHub Actions), AWS (EC2, S3, CloudWatch), Linux, Agile/Scrum.

Diagnostics – Splunk, Dynatrace, log analysis, root-cause analysis, metrics/CSAT-driven troubleshooting.

PROJECTS

Ireland Jobs Tracker — Automated Job-Search Pipeline & Dashboard

- Built an end-to-end Python pipeline that scrapes 1,300+ job listings daily into a cloud Postgres database (Supabase), exposed through a Vercel serverless API and an analytics dashboard.
- Automated scraping, database sync, and daily backups with GitHub Actions; added pagination and insert-only sync to keep the 1,300-row dataset consistent and prevent overwrites.

Spring Boot E-Commerce Backend

- Developed a Java Spring Boot e-commerce backend with REST APIs for catalog, cart, and orders, backed by a relational database via JPA/Hibernate and secured with JWT authentication.
- Designed the schema and tuned queries and indexes for product search and checkout, containerised the service with Docker, and added integration tests in a CI pipeline.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
