PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** RESTful APIs for internal services, handling approximately **1,500 requests per minute** during peak hours.
- Implemented data processing pipelines using **Python** and **Pandas** to automate report generation, reducing manual effort by an estimated **15 hours per week** for the operations team.
- Managed production incidents for enterprise applications on **AWS** using **Splunk** and **Dynatrace** for monitoring and root cause analysis, ensuring adherence to critical SLAs.
- Designed and deployed containerized applications using **Docker** on **AWS EC2** instances, incorporating basic CI/CD principles with **Jenkins** for automated builds and deployments.
- Collaborated with cross-functional teams to gather requirements and define technical specifications for new feature development within an **Agile/Scrum** framework.
- Performed complex **SQL** queries and data validation across **PostgreSQL** and **MySQL** databases for ad-hoc analysis and to support backend service integrations.
- Authored comprehensive technical documentation and runbooks for production systems, facilitating smoother knowledge transfer and faster incident resolution for the support team.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Observability – Splunk, Dynatrace, Jira, Confluence

BI/Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling

PROJECTS

Enterprise Application Performance Monitoring Dashboard

- Developed a **Java Spring Boot** backend service to aggregate metrics from **Splunk** and **Dynatrace** logs for an internal operations dashboard.
- Designed and implemented RESTful endpoints to expose performance data, enabling real-time visualization of key application health indicators.
- Integrated with **PostgreSQL** to store historical performance data, allowing for trend analysis and capacity planning for enterprise systems.

Automated Data Pipeline for Financial Reporting

- Built a **Python** ETL pipeline using **Pandas** and **SQL** to extract, transform, and load data from multiple sources into a data warehouse.
- Automated the generation of weekly financial summary reports, reducing manual processing time by approximately **10 hours per week** and improving data accuracy.
- Scheduled and monitored pipeline execution using cron jobs on a **Linux** environment, ensuring reliable data delivery for business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
