HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed site **Maximo** CMMS ensuring adherence to best practices, procedures, and compliance standards for operational efficiency.
- Developed Python scripts to automate data extraction for maintenance work order analysis, identifying trends in equipment failure history across **PostgreSQL** and **Oracle** databases.
- Contributed to the refinement of preventive maintenance programs by conducting effectiveness assessments and proposing optimization strategies for critical plant assets.
- Monitored plant equipment operations using **Splunk** and **Dynatrace** to proactively identify potential failures and minimize operational risks.
- Collaborated with cross-functional teams on improvement initiatives, contributing to the optimization of critical asset performance and reliability.
- Analyzed maintenance work orders and failure data to develop actionable solutions for recurring equipment issues, reducing unscheduled downtime by approximately **15%**.
- Containerized Java Spring Boot applications using **Docker** for deployment on **AWS EC2** instances, improving deployment consistency and reducing setup time.

SKILLS

Reliability Engineering – RCM, FMEA, RCA, Predictive Maintenance, Mechanical Integrity, Preventive Maintenance Optimization

CMMS – Maximo

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Programming & Scripting – Java, Spring Boot, Python, SQL

Databases – PostgreSQL, MySQL, Oracle

Monitoring & Observability – Splunk, Dynatrace

Methodologies – Agile, Scrum, Continuous Improvement

PROJECTS

Site CMMS Optimization for Asset Reliability

- Enhanced site **Maximo** CMMS functionality by implementing new work order categorization and reporting modules, improving data accuracy for reliability analyses.
- Developed Python scripts to automate the ingestion and analysis of maintenance logs, identifying key failure modes for critical assets and informing preventive maintenance schedules.
- Collaborated with site engineering and operations teams to define reliability specifications for new equipment installations, ensuring alignment with the Maintenance Excellence Program.

Automated Failure Analysis Dashboard

- Built a Python-based data pipeline to aggregate and process equipment failure history from multiple sources, including **PostgreSQL** and system logs.
- Designed and implemented interactive dashboards using **Power BI** to visualize failure trends, MTBF, and maintenance costs, providing actionable insights to engineering leadership.
- Analyzed maintenance work order data to identify root causes for ~40 recurring equipment failures, leading to targeted improvements that reduced related incidents by an estimated **18%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
