HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs to support new microservices, ensuring seamless integration with existing enterprise systems and achieving **~15% reduction** in data retrieval times.
- Developed and maintained **Hibernate/JPA** persistence layers for core banking applications, managing complex object-relational mappings and ensuring data integrity across multiple transaction processing workflows.
- Engineered **JUnit and Mockito** test suites for critical Java modules, increasing unit test coverage by **20%** and identifying **~30%** of potential regressions before deployment.
- Mentored junior engineers on **Java development best practices**, conducting **code reviews** and pair programming sessions to improve code quality and adherence to design patterns, resulting in a **10% decrease** in critical bug reports.
- Contributed to **technical estimations** for new feature development within **Agile Scrum sprints**, breaking down complex user stories into actionable technical epics with clear workload assessments.
- Integrated **PostgreSQL and MongoDB** databases into backend services, designing schemas and query patterns to support diverse data storage needs for new application features.
- Containerised **Java Spring Boot applications** using **Docker** and deployed them to an **AWS EKS** cluster, configuring basic resource limits and health checks for improved operational stability.

SKILLS

Backend Development – Java, Spring Boot, Hibernate, JPA, RESTful APIs, Microservices, OOP, Design Patterns, JUnit, Mockito, Maven

Databases – PostgreSQL, MySQL, Oracle, MongoDB, Relational Databases, NoSQL Databases

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), CI/CD, Jenkins, Git, Terraform

Messaging & Event-Driven – AWS SQS/SNS, Kafka, Event-Driven Architectures

API Technologies – RESTful APIs, GraphQL, WebSockets

Authentication & Authorization – OAuth 2.1, OpenID Connect, JWT, IAM

Programming Languages – Java, Python, SQL, Bash Scripting

PROJECTS

Java Microservices for Enterprise Integration (HCL Technologies)

- Developed a suite of **Java Spring Boot** microservices to integrate disparate enterprise systems, exposing **RESTful APIs** for data exchange and process orchestration.
- Implemented **Hibernate** for efficient data access and persistence layers, managing complex entity relationships and ensuring transactional consistency across service boundaries.
- Containerised services with **Docker** and managed deployments to a shared **AWS EKS** environment, improving developer productivity and deployment frequency by **~25%**.

Backend API for Transaction Processing (HCL Technologies)

- Designed and built **Java** backend APIs to process and validate financial transaction data, handling approximately **3,000 transactions per hour** during peak periods.
- Integrated with **PostgreSQL** to store and retrieve transaction records, implementing robust error handling and logging mechanisms for auditing and debugging.
- Collaborated with cross-functional teams to define API contracts and ensure smooth integration with upstream and downstream systems, supporting the operational dashboard for a financial-services client.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
