HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Embedded with client teams to deploy, scale, and operationalise **AI platforms**, translating ambiguous business problems into working production systems over rapid experimentation cycles.
- Designed and governed **AI architectures** across enterprise stacks, integrating identity, data, security, and platform layers to ensure seamless workflow execution.
- Built reusable patterns and **playbooks** that clients adopt for ongoing ownership, codifying delivery learnings to scale across multiple engagements.
- Developed and deployed **agentic solutions** incorporating orchestration, context engineering, and RAG patterns within enterprise environments.
- Owned end-to-end production outcomes, including **time-to-value**, reliability, and adoption velocity for deployed AI platforms.
- Constructed **data pipelines** using Python and SQL to prepare datasets for model training and operational reporting, processing approximately 5,000 records per hour.
- Containerised Java Spring Boot services using **Docker** and deployed them to a Kubernetes cluster (EKS), managing configuration and resource allocation for predictable rollouts.

SKILLS

AI/ML Platforms – Anthropic, OpenAI, Microsoft, Google, Salesforce, SAP, Palantir

Cloud-Native Systems – APIs, microservices, containerization, serverless, AWS, Docker, Kubernetes

Agentic Solutions – agents, orchestration, context engineering, RAG, workflows

Programming Languages – Java, Python, SQL, Bash

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, LangChain

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Jenkins, Git, Jira, Confluence

PROJECTS

Enterprise AI Platform Deployment & Operationalisation

- Embedded with a financial services client to deploy and scale an **AI platform**, focusing on integrating identity and security layers for production readiness.
- Designed and implemented a **RAG workflow** to surface relevant customer data for an LLM-powered support agent, reducing average query resolution time by 30%.
- Developed **deployment playbooks** for AI models, enabling client operations teams to manage updates and monitor performance post-handover.

Python Data Pipeline for Operational Insights

- Developed a Python-based **data pipeline** to aggregate transaction data from multiple sources, supporting reconciliation workflows for an enterprise client.
- Engineered **SQL queries** and transformations to cleanse and validate data, ensuring accuracy for downstream reporting and audit trail generation.
- Containerised the pipeline using **Docker** and scheduled execution via cron jobs on Linux EC2 instances, ensuring reliable data processing.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
