PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Terraform** modules for provisioning **Azure** cloud infrastructure, including virtual networks, Kubernetes clusters, and managed databases.
- Developed and maintained reusable **Helm** charts to standardize application deployments onto **Kubernetes** and **OpenShift** platforms, reducing onboarding time by approximately **30%**.
- Automated CI/CD pipeline creation and management using **Argo CD** and GitOps workflows, enabling immutable deployments and golden-path delivery for multiple product teams.
- Enhanced system observability by integrating **Grafana** dashboards with Prometheus metrics and structured logging from diverse services, improving incident detection speed by an estimated **40%**.
- Collaborated with software engineering teams to define and implement platform capabilities, focusing on self-service tooling and API design to improve developer experience and platform adoption.
- Participated in on-call rotations, responding to P1/P2 incidents, performing root-cause analysis, and contributing to post-incident reviews to drive operational excellence.
- Developed **Python** scripts to automate platform operational tasks, including user management, resource monitoring, and log aggregation, reducing manual effort for the platform team by **15 hours** per week.

SKILLS

Cloud Platforms – Azure, AWS

Container Platforms – Kubernetes, OpenShift, Docker

Infrastructure as Code – Terraform, Helm

GitOps & CI/CD – Argo CD, Flux, GitOps, Jenkins

Observability & Reliability – Grafana, Prometheus, Logging, Metrics, Alerting, SRE

Databases & Platform Services – PostgreSQL, MongoDB

Automation & Scripting – Python, Bash

PROJECTS

Internal Developer Platform Automation

- Engineered **Terraform** modules and **Helm** charts to automate the deployment of core platform services on **Kubernetes**, managing infrastructure for a team of **25** engineers.
- Implemented **Argo CD** for GitOps-driven application deployments, establishing immutable promotion patterns and reducing deployment failures by **22%**.
- Developed automated health checks and self-healing mechanisms for critical platform components, contributing to an improvement in overall platform availability.

Cloud-Native Observability Stack

- Designed and deployed a centralized logging and metrics aggregation system using **Prometheus** and **Grafana**, providing unified dashboards for over **50** microservices.
- Integrated distributed tracing capabilities into the platform, enabling faster identification of performance bottlenecks across service interactions.
- Created automated alerting rules based on key performance indicators and error rates, reducing the Mean Time To Detect (MTTD) by approximately **35%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
