# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Developed and maintained **Python** automation scripts for data ingestion and report generation, processing approximately **15 GB** of daily data.
- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, handling an average of **2,500 requests per minute**.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, resolving P1/P2 incidents within defined SLAs.
- Engineered **Python** ETL pipelines that aggregated data from disparate sources into a centralized data warehouse, supporting downstream analytical needs.
- Collaborated on the design and development of **Kubernetes** infrastructure for deploying and managing microservices, improving deployment frequency by **30%**.
- Contributed to the development of multiplayer features and backend systems, performing root cause analysis on performance bottlenecks.
- Automated build and deployment workflows using **Jenkins** and Git, reducing manual intervention in the release process by **40%**.

## SKILLS

**Languages** – Python, Java, C++, SQL, Bash

**Frameworks & Libraries** – Spring Boot, Flask, FastAPI, pandas, NumPy, scikit-learn

**Databases** – MySQL, PostgreSQL, Oracle

**Cloud & Containerization** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

**Tools & Technologies** – Git, Jenkins, Jira, Confluence, Splunk, Dynatrace, Linux

**Networking** – TCP, UDP, HTTP

## PROJECTS

**Distributed Game State Synchronization Service**

- Developed a **Java Spring Boot** microservice to manage real-time game state synchronization for multiplayer sessions, handling up to **10,000 concurrent connections**.
- Implemented efficient data serialization and network protocols (**TCP/UDP**) to minimize latency and bandwidth usage for state updates.
- Containerized the service using **Docker** and deployed it to a **Kubernetes** cluster, ensuring scalability and high availability.

**Automated Build and Deployment Pipeline**

- Designed and implemented an end-to-end **CI/CD** pipeline using **Jenkins** and **Git** for a backend microservice.
- Integrated automated testing suites (unit and integration tests) into the pipeline, catching approximately **60%** of regressions before production deployment.
- Configured infrastructure-as-code using **Bash** scripting for environment setup, streamlining the deployment process across development and staging.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
