HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **ETL/ELT data pipelines** using **Python/PySpark** and **Databricks**, ingesting data from diverse sources including databases and APIs into a **Delta Lake** structure.
- Implemented **bronze, silver, and gold datasets** with reusable, configuration-driven approaches, ensuring data integrity through incremental processing, schema handling, and error restoration.
- Applied **data-quality rules**, unit testing, and lineage tracking to support **trusted data products** for enterprise reporting and analytics consumption.
- Created curated datasets optimized for downstream consumption by **Power BI** reports, enterprise analytics platforms, and **data science** initiatives.
- Utilized **Git** and **Azure DevOps** for branching, pull requests, and CI/CD integration, contributing to user stories and maintaining traceability for code changes.
- Monitored production data pipelines, resolved incidents, and performed root-cause analysis, documenting operational procedures to ensure system stability.
- Containerized data pipeline components using **Docker** and deployed them to cloud environments, focusing on efficient resource utilization and deployment consistency.

SKILLS

Data Engineering Tools – Databricks, Delta Lake, Azure Data Lake

Programming Languages – Python, PySpark, SQL

Cloud Platforms & Services – Azure (general)

Data Warehousing Concepts – ETL/ELT, data integration, lakehouse patterns, data quality checks

Development Practices – Git, Azure DevOps, CI/CD, Agile, unit testing, integration testing, reconciliation testing

BI & Analytics Consumption – Power BI

PROJECTS

Azure Data Lakehouse for Industrial IoT Data

- Engineered a multi-stage data pipeline in **Databricks** using **PySpark** to ingest and process telemetry data from industrial IoT devices, landing structured data in **Delta Lake**.
- Developed **bronze, silver, and gold layers** to transform raw sensor readings into aggregated metrics and features, enabling downstream analytics and reporting on operational efficiency.
- Implemented **reconciliation checks** and audit trails within the pipeline to ensure data accuracy and track lineage from source to curated datasets.

Power BI Dashboard for Manufacturing Throughput

- Built a **Power BI** dashboard to visualize key manufacturing throughput metrics, consuming curated datasets from an Azure data lake.
- Developed **DAX measures** and complex data models within Power BI to support interactive slicing and dicing of production data by shift, line, and product.
- Collaborated with operations analysts to gather requirements and refine visualizations, ensuring the dashboard provided actionable insights for process improvement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
