PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed scalable **Python** REST APIs using **FastAPI** and **Pydantic**, supporting asynchronous programming models for high-throughput applications.
- Contributed to the implementation of **AI features** for automation and data intelligence within the company's digital ecosystem, integrating machine learning components.
- Participated in the full software development lifecycle within **Agile Scrum teams**, including sprint planning, daily stand-ups, and iterative delivery of features.
- Collaborated with **data science and product management teams** to translate business requirements into technical specifications and deliver integrated software solutions.
- Implemented and maintained **CI/CD pipelines** using **GitHub Actions**, automating build, test, and deployment processes to ensure rapid and reliable releases.
- Supported the deployment and operation of **containerized solutions** on cloud platforms, adhering to cloud-native principles and best practices.
- Engaged in **code reviews and pair programming** sessions to uphold code quality, share knowledge, and drive continuous improvement within the engineering team.

SKILLS

Languages – Python, SQL, Java, HTML, CSS

Frameworks & Libraries – FastAPI, Flask, Pydantic, asyncio, Spring Boot, pandas, NumPy, scikit-learn

AI/ML – Machine Learning, Data Intelligence, AI Features, Model Integration

Cloud & DevOps – AWS, Docker, Kubernetes, GitHub Actions, CI/CD, Cloud-Native Principles, Azure, ArgoCD

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Methodologies – Agile, Scrum, Kanban, TDD, BDD

Tools & Platforms – Git, Jira, Confluence, Jenkins, Linux, Splunk, Dynatrace, VSCode, PyTest, Postman

PROJECTS

AI-Powered Anomaly Detection Service

- Developed a **Python FastAPI** service to ingest real-time data streams and perform anomaly detection using a trained **scikit-learn** model.
- Engineered data pipelines using **pandas** to preprocess and feature-engineer data for model input, processing approximately 1,500 events per minute.
- Implemented **unit and integration tests** with PyTest, ensuring service reliability and adherence to **Pydantic** data validation schemas.

Scalable Cloud-Native API Platform

- Designed and built a **Java Spring Boot** microservice for processing user authentication requests, integrating with an external OAuth2 provider.
- Containerized the application using **Docker** and deployed it to an **AWS EC2** instance managed via Jenkins CI/CD pipelines for automated deployments.
- Wrote comprehensive **JUnit tests** and performed manual testing using Postman to validate API endpoints and ensure data integrity.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
