HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts for automating data ingestion and transformation tasks, reducing manual processing time by approximately **40%**.
- Built and debugged **Java Spring Boot** REST APIs to support inter-service communication for enterprise applications, ensuring reliable data exchange.
- Managed production incidents for enterprise applications, performing root cause analysis and coordinating resolution to meet strict SLAs.
- Created hardware solutions to validate the **IP functional performance** of next-generation components, directly supporting product development cycles.
- Maintained and improved current **hardware laboratory environment**, enhancing debug capabilities and contributing to a faster Go-To-Market plan.
- Provided **technical support** to internal engineering teams, troubleshooting complex issues and offering solutions for application performance.
- Containerized application services using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and scalability.

SKILLS

Programming Languages – Python, Java, C/C++, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Tools & Technologies – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Mathworks, NI SW

Hardware & RF – RF laboratory benches, IP functional performance validation, RF System On Chip, RF Substrate design tools

PROJECTS

Automated RF Test Bench for IP Validation

- Developed **Python** scripts to automate the setup and execution of RF test benches for application IP validation, reducing test cycle time by **30%**.
- Built custom **hardware solutions** to interface with next-generation components, enabling precise measurement of RF performance parameters.
- Maintained and enhanced the existing **hardware laboratory environment**, implementing new monitoring tools that improved debug efficiency for the engineering team.

High-Throughput Data Pipeline for Performance Monitoring

- Engineered a **Python**-based data pipeline to ingest and process high-volume RF performance data from test benches, handling approximately **5,000 events per hour**.
- Integrated the pipeline with **AWS S3** for data storage and **CloudWatch** for operational monitoring, ensuring data availability and system health.
- Collaborated with cross-functional teams to define data requirements and ensure the pipeline met the needs for application performance analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
