HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **dimensional data models** and **data warehouse solutions** for enterprise clients, ensuring a unified source of truth from disparate data sources.
- Developed **ETL pipelines** using **Python** and **SQL**, processing data from various sources into structured data warehouses for analytical consumption.
- Wrote advanced **T-SQL queries**, **stored procedures**, and **functions** to retrieve, manipulate, and manage database objects, optimizing query performance for large datasets.
- Collaborated with stakeholders to gather requirements, define project scope, and deliver **custom data warehousing solutions** with minimal supervision in ambiguous environments.
- Supported the release of **data solutions** into production, coordinating with operations teams and providing technical assistance to data consumers for error resolution.
- Authored comprehensive **technical documentation** detailing database development logic, scripting procedures, testing methodologies, and change management processes.
- Containerized **data processing services** using **Docker** and deployed them to cloud environments, ensuring scalable and reliable data pipeline execution.

SKILLS

Data Warehousing – Dimensional Data Modeling, ETL Development, Data Warehousing Best Practices, Azure, SQL Server, Databricks, SSIS, Data Factory

Databases – Relational Databases, SQL, T-SQL, Stored Procedures, Functions, Query Optimization, Database Administration

Programming – Python, SQL

Cloud & Containerization – Docker, AWS, Azure, GCP

Methodologies – Agile, Scrum

Tools – Jira, Confluence, Jenkins, Git

PROJECTS

Enterprise Data Warehouse Modernization

- Engineered a **data warehouse solution** integrating data from multiple legacy systems into a unified relational model, supporting enhanced business intelligence reporting.
- Developed complex **ETL scripts** in **Python** to extract, transform, and load approximately 500GB of data daily, ensuring data integrity and consistency.
- Implemented **T-SQL stored procedures** and indexing strategies to optimize query performance, reducing report generation times by an average of 30% for key business metrics.

Customer Data Integration Platform

- Built a scalable **data pipeline** to consolidate customer data from disparate sources including CRM and transactional databases into a central repository.
- Designed and implemented database schemas and relationships using **SQL**, facilitating efficient data retrieval and analysis for customer segmentation and behaviour tracking.
- Provided technical guidance to internal teams on data access patterns and report generation, ensuring effective utilization of the integrated data platform.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
