PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented data models and ontology frameworks for **large-scale business applications** across multiple geographies, ensuring scalability and future-proofing of data systems.
- Collaborated with **product owners**, engineers, and the Data Governance team to enforce high data quality, security, and privacy compliance across business applications.
- Assisted in the design and integration of **enterprise information assets**, services, and business systems to optimize data usage and adhere to governance standards.
- Developed and maintained **data architecture systems**, documenting improvements and educating teams on data governance standards and best practices.
- Analyzed market and industry trends in **data architecture**, applying insights to enhance information lifecycle management and data integration processes.
- Developed **Python ETL pipelines** to ingest and transform data for analytical reporting, processing approximately 50,000 records daily for downstream consumption.
- Containerized **Java Spring Boot** microservices using Docker, deploying them to an AWS EC2 environment managed via Jenkins CI/CD pipelines.

SKILLS

Data Modeling – 3NF, Dimensional Modeling, Data Vault, ER Modeling, Ontology Frameworks, Conceptualization, Design of Data Assets

Data Analysis & Profiling – SQL, Data Warehousing, Data Marts, Master Data Management, Reference Data Management

Programming & Scripting – Python, Java, SQL, Spring Boot, REST APIs, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Data Governance & Security – Data Quality, Privacy Compliance, Security Best Practices

AI/LLM Integration – AI-driven Solutions, LLM Integration, Generative AI Concepts

PROJECTS

Enterprise Data Ontology for Insurance Operations

- Developed a comprehensive data ontology and associated **data models** in **SQL** to represent insurance policy lifecycles and claims processing workflows.
- Integrated the new data models with existing **Java Spring Boot** services, ensuring seamless data flow and consistent representation of critical business entities.
- Documented data lineage and transformation rules, establishing clear governance standards for data stewards and analysts working with the new ontology.

Automated Transaction Reconciliation Service

- Built a **Python** service on **AWS Lambda** to automate the reconciliation of financial transactions between internal ledgers and external payment gateways.
- Implemented robust error handling and logging using **Python** and **AWS CloudWatch**, reducing manual reconciliation effort by an estimated 40% for the operations team.
- Designed the data processing logic to handle approximately 15,000 transaction records per hour, ensuring data integrity through checksum validation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
