PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed new medical device components from concept through design freeze, integrating feedback from customer inquiries and technical feasibility assessments.
- Managed the end-to-end lifecycle of product development projects, ensuring adherence to strict timelines, cost targets, and technical deliverables for new device prototypes.
- Mentored and guided junior engineers on technical best practices for product design and process development, fostering a collaborative team environment.
- Created detailed product and tooling drawings using **CAD systems** to support quoting processes, rapid prototyping, and initial manufacturing process development.
- Provided technical support to Sales and Marketing teams, assisting in the creation of comprehensive quotations for new medical device opportunities.
- Drove **continuous improvement** initiatives within the R&D; team, applying Lean tools such as **5S** and **DMAIC** to optimize workflows and reduce development cycle times.
- Ensured compliance with **ISO 45001** and **ISO 14001** standards by integrating health, safety, and environmental considerations directly into the design and development phases of new products.

SKILLS

Engineering – Product Development, Process Development, Prototyping, Quality Assurance, Regulatory Compliance, Health & Safety, Lean Manufacturing, Six Sigma, DMAIC, 5S, ISO 45001, ISO 14001, ISO 50001.

CAD/Design – Solid Edge, CAD Systems, Product Drawings, Tooling Drawings.

Communication – Verbal Communication, Written Communication, Technical Support, Customer Enquiries, Sales Support, Marketing Support.

Project Management – Timeline Management, Cost Target Management, Technical Deliverables, Cross-functional Collaboration, Production Support, Staff Training, Validations.

Software & Tools – Microsoft Excel, Microsoft PowerPoint, Microsoft Word.

PROJECTS

Medical Device Component Design & Prototyping (HCL Technologies)

- Engineered novel components for a medical device client, producing detailed **CAD drawings** and functional prototypes to validate design concepts and manufacturing feasibility.
- Collaborated with client stakeholders to refine product specifications based on early feedback, adjusting designs to meet performance requirements and target cost points.
- Supported the transfer of the new component design to the production team, contributing to validation protocols and initial staff training sessions.

Process Optimization for Medical Device Manufacturing (HCL Technologies)

- Analyzed existing manufacturing processes for catheter assemblies, identifying bottlenecks and areas for improvement using **Lean tools** and data analysis.
- Developed and presented a revised process flow that incorporated new tooling and automation, projecting a **15% reduction** in cycle time for a key production step.
- Documented the proposed process changes and assisted in the planning of pilot runs to validate the effectiveness of the optimized workflow.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
