HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Selenium**-based automated test suites for backend applications, executing over **1,500 test cases** per regression cycle to validate core functionality.
- Designed, developed, and maintained reusable **automation frameworks** and testing utilities, reducing test script development time by approximately **30%** for new feature testing.
- Integrated automated tests into **CI/CD pipelines** using Jenkins, enabling automated deployment validation and reducing manual testing overhead by **40%**.
- Collaborated with cross-functional teams of developers and QA engineers to enhance test coverage for backend services and APIs, contributing to a **15% reduction** in critical production defects.
- Identified, documented, and tracked defects using **Jira**, providing detailed reports on system quality and regression status to product teams.
- Performed **API and service-layer testing** to validate backend integrations and system workflows, ensuring data consistency across interconnected systems.
- Analyzed test results and provided clear reporting on system quality and regression status, identifying key areas of instability for targeted developer focus.

SKILLS

Test Automation – Selenium, Backend Testing, API Testing, Service-Layer Testing, Test Design Patterns, Automation Frameworks

Programming Languages – Python, Java, SQL

CI/CD & Version Control – Jenkins, Git

Tools & Methodologies – Jira, Agile, Scrum, Defect Tracking, Test Management

Backend Technologies – REST APIs, Spring Boot, PostgreSQL, MySQL, Oracle, Linux

PROJECTS

Automated Backend Service Testing Framework

- Engineered a modular **Python**-based automation framework to support backend service testing, incorporating reusable components for API request/response handling and data validation.
- Developed a suite of over **200 automated tests** covering critical API endpoints and system workflows, ensuring consistent data flow and functionality for enterprise applications.
- Integrated the test suite into a **Jenkins** CI/CD pipeline, enabling automated execution on code commits and providing rapid feedback on build stability.

API Integration Testing for Enterprise Systems

- Designed and implemented automated tests for REST APIs integrating various enterprise backend systems, focusing on data integrity and cross-system workflow validation.
- Used **SQL** to perform backend data validation, verifying that transactional data persisted correctly across multiple databases (PostgreSQL, Oracle) after API interactions.
- Contributed to the overall quality assurance process by documenting and tracking identified defects in **Jira**, collaborating with developers on resolution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
