PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented scalable **Databricks data pipelines** to ingest and transform large volumes of data, supporting downstream analytics and reporting needs.
- Developed and optimized **ETL/ELT workflows** using **Airflow** for automated and reliable data delivery to data lake and data warehouse environments, processing approximately **5 TB** of data daily.
- Managed and enhanced **cloud-based data platforms** on **AWS**, focusing on performance tuning and cost efficiency, reducing operational expenditure by **15%**.
- Implemented and maintained **data quality and governance frameworks** using tools like **Atlan**, ensuring data accuracy and compliance across critical data assets.
- Partnered with **business stakeholders** and BI teams to design and deliver analytics-ready datasets, facilitating data-driven decision-making for key operational metrics.
- Collaborated with senior data engineers and architects on the design and implementation of complex **data warehouse solutions**, ensuring adherence to data modelling best practices.
- Containerized data pipeline services using **Docker** and deployed them to a managed **Kubernetes** cluster (EKS), enabling more reliable and scalable deployments.

SKILLS

Cloud Platforms – AWS, Azure, GCP, Data Lake technologies

Data Engineering Tools – Databricks, Airflow, ETL/ELT tools

Data Warehousing & Modelling – Data Warehouse solutions, Data Modelling concepts

BI & Data Quality – PowerBI, Data Quality tools, Data Governance tools, Atlan, Monte Carlo

Programming & Scripting – Python, SQL

Orchestration & Deployment – Kubernetes, Docker

PROJECTS

Enterprise Data Lake Modernization with Databricks

- Developed robust **Databricks pipelines** in Python to ingest diverse data sources, including streaming and batch data, into a centralized data lake.
- Implemented **data quality checks** and validation routines within the pipelines, reducing data error rates by **22%** before data reached the data warehouse.
- Collaborated with the data warehousing team to define schemas and optimize data structures for efficient querying and analysis by BI tools.

Automated Financial Transaction Processing Pipeline

- Engineered an end-to-end **Python ETL pipeline** to process and reconcile financial transaction data, handling approximately **50,000 transactions** per hour.
- Integrated the pipeline with **Airflow** for scheduling and monitoring, ensuring reliable and automated data flow to downstream reporting systems.
- Developed **SQL scripts** for data validation and transformation, ensuring data integrity and compliance with regulatory reporting requirements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
