HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and delivered large-scale, cloud-native data solutions on **AWS**, focusing on data lake and data warehousing strategies.
- Developed and maintained complex data pipelines using **Python** and **PySpark**, integrating with **Airflow** for orchestration and monitoring.
- Implemented data quality and governance checks within data pipelines, ensuring data integrity and compliance for enterprise data assets.
- Designed and built interactive dashboards and reports using **Power BI**, translating complex data into actionable business insights for stakeholders.
- Managed and deployed machine learning models into production environments, incorporating MLOps principles and using **MLflow** for model tracking and lifecycle management.
- Proficiently coded in **Python**, **SQL**, and **Scala** for data manipulation, transformation, and analysis across diverse datasets.
- Collaborated within an Agile framework, participating in sprint planning, code reviews using **GitHub**, and technical estimation for feature development.

SKILLS

Cloud Platforms – AWS, Azure, GCP

Data Warehousing & Lakehouse – Databricks, Snowflake, Delta Lake, Data Lake

Orchestration & ETL – Airflow, PySpark, Python

MLOps & ML – MLflow, scikit-learn

BI & Dashboarding – Power BI, Tableau

Databases & Data Modeling – SQL, Data Modelling

Version Control & CI/CD – GitHub, GitHub Actions

PROJECTS

Cloud Data Warehouse Modernization

- Architected and implemented a scalable data warehouse solution on **AWS** using **Snowflake** and **Delta Lake**, consolidating disparate data sources.
- Developed **Python** and **PySpark** scripts to build robust ETL pipelines for data ingestion and transformation, processing over 500GB of daily data.
- Designed comprehensive data models to support analytical reporting and downstream machine learning workflows, improving query performance by 30%.

ML Model Deployment Pipeline

- Engineered an end-to-end MLOps pipeline using **MLflow** and **GitHub Actions** for automated model training, validation, and deployment to a cloud environment.
- Developed a **Python**-based inference service for a predictive model, achieving p95 latency below 150ms for real-time scoring.
- Implemented data validation and monitoring checks within the pipeline to ensure model performance and data quality, reducing model retraining triggers by 20%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
