HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for a core financial services platform, handling over 2,000 requests per minute and integrating with downstream systems.
- Developed and maintained **Hibernate** entities and JPA repositories to manage complex relational data schemas for enterprise applications, ensuring data integrity and efficient querying.
- Wrote extensive **JUnit** and **Mockito** tests for Java components, achieving over 90% code coverage and significantly reducing production defects for new feature releases.
- Contributed to the design and development of scalable, reliable services, breaking down complex, ambiguous problems into well-defined, solvable components for internal tooling.
- Conducted code reviews as a core engineering practice, providing constructive feedback to peers and validating correctness against design specifications and best practices.
- Utilized **GenAI** and **AI-powered tools** to accelerate development workflows, critically validating and integrating AI-generated code snippets for routine tasks.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring consistent environments across development and production.

SKILLS

Programming Languages – Java, Python, SQL, R, TypeScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms & Services – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

DevOps & Tools – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

BI & Data Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling

AI & ML – GenAI, AI-powered tools, Machine Learning Fundamentals

PROJECTS

Enterprise Java Platform Enhancement

- Developed new microservices using **Java Spring Boot** and **Hibernate** to extend core banking functionalities, supporting transaction processing for an enterprise client.
- Implemented robust error handling and logging mechanisms across the service layer, improving system stability and reducing critical incident frequency by approximately 15%.
- Wrote comprehensive unit and integration tests using **JUnit**, ensuring high code quality and facilitating seamless integration with existing enterprise systems.

Automated Data Ingestion Pipeline

- Engineered a **Python**-based ETL pipeline to ingest and transform data from multiple sources into a central data warehouse, processing approximately 500,000 records daily.
- Developed **pandas** scripts for data cleaning, validation, and aggregation, significantly improving data quality for downstream analytical reporting.
- Integrated the pipeline with **AWS S3** for data storage and utilized **SQL** for data manipulation and loading into PostgreSQL, forming a key part of the data analytics workflow.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
