PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered **event-driven data pipelines** on AWS Lambda to ingest, validate, and enrich change events, enabling **real-time risk assessment** for thousands of services.
- Developed and extended an **application discovery and metadata platform**, auto-discovering services, dependencies, and resilience posture across Amazon's Stores.
- Operated production services within the **Central Reliability and Response Engineering** organization, adhering to high availability standards and participating in the on-call rotation.
- Collaborated with cross-functional teams across Amazon to define and deliver **resilience standards** for internal development teams, ensuring consistent application of best practices.
- Designed and implemented **autonomous agents** that evaluate configuration and code changes, providing real-time risk judgments before deployment to production environments.
- Integrated diverse data sources, including **service graphs and deployment metadata**, into an intelligence layer consumed by both human operators and AI systems.
- Containerized microservices using **Docker** and deployed them to an **AWS EKS** cluster, configuring basic resource limits and monitoring.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EKS)

Programming Languages – Java, Python, SQL, JavaScript

Frameworks & Libraries – Spring Boot, Node.js, NestJS, React, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle, NoSQL

DevOps & CI/CD – Docker, Kubernetes, Jenkins, Git, CI/CD, Helm

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R/RStudio

PROJECTS

Real-time Change Safety Platform (HCL Technologies)

- Developed a **Java Spring Boot** microservice to process change events from multiple internal systems, calculating risk scores based on historical failure data.
- Constructed a **PostgreSQL** data model to store service metadata and dependency information, supporting complex graph traversals for impact analysis.
- Integrated with an existing **Jenkins** CI/CD pipeline to trigger automated safety evaluations for code deployments, reducing manual review overhead by 40%.

Service Discovery & Health Monitoring (HCL Technologies)

- Built a **Python** script to query cloud provider APIs and internal CMDBs, aggregating service health indicators into a central dashboard.
- Designed and implemented REST APIs using **Flask** to expose discovered service information and health status to downstream consumers.
- Automated the deployment of monitoring agents to EC2 instances using **AWS Systems Manager**, ensuring consistent data collection.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
