PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented Oracle database architecture and best practices for an **enterprise cloud platform**, focusing on high availability and performance tuning.
- Led complex investigations into systemic Oracle database issues, driving cross-functional efforts to implement permanent resolutions and reduce customer escalations by **40%**.
- Developed and maintained **PL/SQL** scripts and **Java** database management tooling, establishing coding standards and reusable patterns for a team of 5 engineers.
- Architected and developed **database automation solutions** for Oracle RDS, impacting over 1,000 customer instances and improving operational efficiency.
- Mentored **junior database engineers** and software development engineers on Oracle database internals, performance optimization, and AWS integration best practices.
- Owned **on-call operations** for managed Oracle database services, performing incident response, root cause analysis, and driving permanent resolution of systemic issues.
- Built comprehensive **automation frameworks** for Oracle database benchmarking and performance validation, reducing manual testing cycles by **65%**.

SKILLS

Oracle Database Internals – Storage engines, Query optimization, PGA/SGA memory management, Replication mechanisms, Data Guard, Multi-AZ deployments

AWS Services – RDS for Oracle, RDS Custom for Oracle, EC2, VPC, IAM, CloudWatch

Database Technologies – Oracle, PL/SQL, SQL

Programming Languages – Java, Python

DevOps & Automation – Database automation, Performance validation, CI/CD, Jenkins, Docker

Methodologies – Agile, Scrum, Incident Response, Root Cause Analysis

PROJECTS

Oracle RDS Scalability and Performance Enhancement

- Engineered automated solutions for scaling Oracle RDS instances to support over **10,000 concurrent connections**, ensuring low-latency access for enterprise customers.
- Developed **Java** and **PL/SQL** scripts to monitor and optimize database performance, reducing p95 query latency by **30%** across critical workloads.
- Implemented comprehensive testing frameworks for Oracle database features, validating performance and stability under simulated high-load conditions.

Automated Oracle Database Operations Framework

- Built a **Python**-based framework to automate routine Oracle database tasks such as patching, backups, and configuration management for a fleet of **500+ instances**.
- Integrated the automation framework with **AWS CloudWatch** for real-time monitoring and alerting on database health metrics, reducing manual checks by **50%**.
- Created reusable modules for common operational tasks, enabling junior engineers to deploy and manage Oracle databases more efficiently.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
