HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered and deployed **Java Spring Boot** microservices for core backend operations, adhering to strict API design principles and integrating with relational databases.
- Developed and maintained **JPA/Hibernate** entities and data access objects for complex object-relational mapping, ensuring data integrity across enterprise applications.
- Authored comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over 85% code coverage for critical Java modules and reducing post-deployment defects by **18%**.
- Designed and implemented network automation scripts using **Python**, automating repetitive tasks such as configuration deployment and health checks, reducing manual intervention by **~40%**.
- Managed network device configurations and performed troubleshooting across large-scale IP networks, contributing to the overall stability of the cloud infrastructure.
- Participated in on-call rotations to address critical network incidents, performing root cause analysis and implementing permanent fixes to prevent recurrence.
- Containerized network services using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments and simplifying the deployment pipeline.

SKILLS

Networking – IP networking fundamentals, BGP, OSPF, R&S; technologies, network sustaining engineering, network deployment, network scaling, network optimization

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, JPA, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Databases – PostgreSQL, MySQL, Oracle

Operating Systems – Linux/Unix

Tools – Splunk, Dynatrace, Jira, Confluence

PROJECTS

Network Automation Framework for Cloud Infrastructure

- Developed a **Python**-based framework to automate the provisioning and configuration of network devices within a large-scale cloud environment, reducing deployment times by **35%**.
- Implemented automated health checks and diagnostic scripts using **Bash** and **Python** to monitor network performance and identify potential issues proactively across **AWS** infrastructure.
- Integrated the automation framework with **Jenkins** pipelines to enable continuous integration and deployment of network configurations, improving deployment reliability.

Java-based Network Monitoring Service

- Designed and built a **Java Spring Boot** microservice to collect and process network telemetry data, enabling real-time monitoring of key network metrics.
- Utilized **PostgreSQL** for storing historical network performance data and developed **REST APIs** for querying and analysis, supporting operational troubleshooting efforts.
- Wrote unit tests using **JUnit** to ensure the reliability of the monitoring service and its data processing logic.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
