PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices to handle internal DNS record creation and management, ensuring adherence to AWS best practices for load balancing customer onboarding.
- Developed **Python** automation scripts for log analysis and data validation of DNS configurations, reducing manual review time by approximately **40%**.
- Contributed to the CI/CD pipeline for the Internal DNS team, writing and maintaining **Jenkins** jobs for automated testing and deployment of new service features.
- Collaborated with senior engineers to design and architect scalable solutions for managing DNS entries for AWS Load Balancing services, focusing on reliability and ease of integration for customers.
- Participated in code reviews and sprint planning sessions, providing technical estimations and ensuring high-quality, testable code for the platform services.
- Wrote and maintained **unit and integration tests** for core DNS management services, achieving over **85%** code coverage and identifying critical edge cases during development.
- Containerized DNS management services using **Docker** and deployed them to an **AWS EC2** environment, configuring basic resource limits and network policies.

SKILLS

Languages – Java, Python, SQL, Bash

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Git, Jira, Confluence, Splunk, Dynatrace, Linux

PROJECTS

Internal DNS Management Service (HCL Technologies)

- Developed a **Java Spring Boot** application to manage internal DNS records for a financial services client's operational dashboard, handling approximately **500** record updates daily.
- Implemented RESTful APIs for creating, updating, and deleting DNS entries, integrating with the client's existing network infrastructure and adhering to strict change control procedures.
- Wrote comprehensive **unit tests** and functional tests using JUnit to ensure the reliability and correctness of the DNS management functionalities before deployment.

Automated Data Pipeline for Transaction Reconciliation (HCL Technologies)

- Engineered an end-to-end **Python** data pipeline to automate the reconciliation of transaction data from multiple sources, processing over **10,000** records per batch.
- Utilized **pandas** and **SQL** (PostgreSQL) for data extraction, transformation, and loading into a staging database, identifying and flagging discrepancies for further investigation.
- Scheduled and monitored pipeline execution using cron jobs on a **Linux** environment, generating daily summary reports for the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
