HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** RESTful microservices for internal tooling, handling over **1,500 requests per minute** during peak loads.
- Developed and maintained **Hibernate** entities and complex JPQL queries to manage data persistence for enterprise applications, ensuring data integrity across relational databases.
- Engineered **JUnit** and **Mockito** test suites for Java modules, increasing code coverage by **18%** and reducing production defects by **10%**.
- Collaborated with engineering teams to define and estimate technical tasks for new feature development within an **Agile/Scrum** framework.
- Participated in **code reviews**, providing constructive feedback to junior engineers to maintain code quality and adhere to architectural standards.
- Built and deployed containerized applications using **Docker** on **AWS EC2** instances, configuring basic networking and resource limits.
- Developed **Python scripts** to automate data extraction and transformation tasks from various enterprise systems, reducing manual reporting effort by approximately **8 hours per week**.

SKILLS

Cloud Platform – AWS, EC2, S3, Lambda, CloudWatch, Docker

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, JUnit, Mockito, Maven

Scripting & Automation – Python, Shell Scripting

Databases – PostgreSQL, MySQL, Oracle, SQL

CI/CD & Version Control – Jenkins, Git

Observability & Monitoring – Splunk, Dynatrace

Project Management & Collaboration – Jira, Confluence, Agile, Scrum

PROJECTS

Internal DNS Management Service (AWS Load Balancing)

- Developed a **Java Spring Boot** service to manage DNS record creation and lifecycle for internal AWS load balancing solutions, supporting over **500 customer onboarding requests** monthly.
- Engineered a **PostgreSQL** data model to store DNS zone configurations and customer mappings, ensuring data consistency for service lookups.
- Implemented **RESTful APIs** for programmatic DNS record management, integrating with existing AWS infrastructure tooling and providing a clear interface for customer network configuration.

Automated Transaction Reconciliation Workflow

- Created a **Python**-based ETL pipeline to extract transaction data from disparate sources (PostgreSQL, Oracle) and perform automated reconciliation checks, processing approximately **75,000 records daily**.
- Designed and implemented data validation routines using **pandas** to identify discrepancies, flagging over **300 unique reconciliation issues** per week for operations teams.
- Deployed the reconciliation service on **AWS Lambda**, triggered by scheduled events via **CloudWatch**, ensuring timely processing and reducing manual reconciliation overhead.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
