HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented asynchronous workflows and data processing services to analyze network traffic, identifying customer impact during network events and enabling faster resolution.
- Developed automation scripts in **Python** to streamline operational tasks, reducing manual effort for network engineers and improving system reliability.
- Collaborated with network development engineers to automate repetitive operational work, integrating **AI-assisted development** and agent-driven workflows for system management.
- Participated in on-call rotations, gaining direct exposure to production systems at **AWS scale** and troubleshooting customer-impacting issues across services and the network.
- Wrote and reviewed technical design documents, contributing to architectural decisions and mentoring junior engineers through code reviews to ensure high-quality software delivery.
- Analyzed network traffic data using **SQL** and proprietary AWS tooling, identifying performance degradations and root-causing customer-reported issues to drive corrective actions.
- Containerized services using **Docker** and deployed them onto **AWS EC2** instances managed via Jenkins pipelines, ensuring consistent environments and streamlined deployments.

SKILLS

Cloud Platform – AWS, EC2, S3, Lambda, CloudWatch, AWS Direct Connect

Programming Languages – Python, Java, SQL, Shell Scripting

Backend Development – Spring Boot, REST APIs, Microservices, Asynchronous Workflows, Design Patterns

Data Processing & Analysis – Data Pipelines, ETL, Network Traffic Analysis, AI Agents, Machine Learning

DevOps & Operations – Docker, Jenkins, Git, CI/CD, Incident Response, Root Cause Analysis, AI-assisted Development

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Network Performance Monitoring Service

- Developed a **Python**-based data pipeline to ingest and analyze network traffic logs from **AWS CloudWatch**, identifying performance bottlenecks affecting enterprise customers.
- Built REST APIs using **Spring Boot** to expose real-time network health metrics, enabling proactive alerts for potential service degradations.
- Containerized the monitoring service with **Docker** and deployed it on **AWS EC2**, achieving a **30%** reduction in mean time to detect customer-impacting network issues.

Automated Network Event Response System

- Engineered an automation system using **Python** and **SQL** to process network event data, correlating events with customer impact across different AWS regions.
- Integrated with internal ticketing systems via API to automatically create and update incident tickets for network anomalies, reducing manual triage time by approximately **2 hours** per event.
- Designed and implemented alert logic to notify affected customers proactively about network events, improving customer communication during service disruptions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
