HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Rust** and **Go** telemetry collection agents, contributing to the **OpenTelemetry** upstream community.
- Managed production incidents for enterprise applications on **AWS**, resolving P1/P2 issues and ensuring SLA adherence across **Splunk** and **Dynatrace** monitoring.
- Developed **Python** scripts for data pipeline automation and scheduled reporting, processing approximately **500 GB** of data daily.
- Built and maintained highly available, massively scaled systems in an agile team environment, focusing on **telemetry collection** for observability.
- Dived deep into **collection issues** affecting fleets of hosts, applying fixes to prevent recurrence and improve system stability.
- Translated customer and internal requirements into actionable design specifications, breaking down complex work into incremental deliverables for team shipment.
- Containerised microservices using **Docker** and deployed them to **AWS ECS**, managing configurations and basic resource limits for predictable rollout.

SKILLS

Languages – Rust, Go, Python, Java, C++, SQL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, ECS)

Observability & Monitoring – CloudWatch, Splunk, Dynatrace

Containerization – Docker

Data & Messaging – OpenTelemetry, PostgreSQL, MySQL, Oracle

Development Tools – Git, Jenkins, Jira, Confluence

PROJECTS

CloudWatch Agent Development for Metrics Collection

- Developed a new **Rust** agent for telemetry collection, focusing on low-overhead metric gathering from millions of hosts.
- Integrated agent with **OpenTelemetry** standards, contributing to community discussions on protocol enhancements and best practices.
- Implemented robust error handling and logging for agent operations, ensuring reliable data flow to the central **CloudWatch** platform.

Production Incident Resolution for Enterprise Financial Systems

- Responded to and resolved critical production incidents (P1/P2) for enterprise financial services applications, maintaining strict **SLA** adherence.
- Analyzed logs and metrics using **Splunk** and **Dynatrace** to perform root cause analysis on transaction processing failures, reducing recurrence by **40%**.
- Automated diagnostic data collection using **Python** scripts, streamlining the triage process for complex operational issues reported by business analysts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
