HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **REST APIs** in **Java Spring Boot** for synchronous and asynchronous communication between microservices, handling over 5,000 requests per minute during peak loads.
- Developed and maintained **Hibernate** ORM mappings and queries for a complex relational schema, ensuring data integrity and efficient persistence layer operations for enterprise applications.
- Authored **JUnit** and **Mockito** tests for critical Java components, achieving 85% code coverage and significantly reducing regression defects in production releases.
- Contributed to the design and implementation of asynchronous workflows orchestrating function lifecycles, including state propagation and ensuring consistent configuration delivery across global compute fleets.
- Engineered solutions for metadata propagation at scale, addressing ordering guarantees and fault tolerance for configuration changes impacting millions of compute instances.
- Participated in code reviews and sprint planning sessions, providing technical estimations and collaborating on API contract definitions for new distributed system features.
- Containerized microservices using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits for predictable performance.

SKILLS

Languages – Java, Python, SQL, TypeScript

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux, Shell Scripting

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R/RStudio

Concepts – Distributed Systems, API Design, Microservices, CI/CD, Agile/Scrum, Incident Response, Change Management

PROJECTS

Distributed Systems Orchestration Service (HCL Technologies)

- Developed a **Java Spring Boot** service to manage the lifecycle of enterprise applications, handling deployment and configuration updates across multiple environments.
- Implemented asynchronous event handling using **JMS** and **Spring** integration patterns to ensure reliable state propagation for over 150 concurrent application instances.
- Integrated with **AWS S3** for artifact storage and **Jenkins** for automated build and deployment pipelines, reducing manual deployment effort by 40%.

Customer Function Orchestration Platform (HCL Technologies)

- Designed and built a scalable control plane service in **Python** and **FastAPI** to orchestrate customer-defined functions, managing registration and execution state.
- Implemented robust error handling and retry mechanisms for inter-service communication, ensuring high availability for critical customer workflows.
- Developed **SQL** scripts for managing function metadata and configuration in a **PostgreSQL** database, supporting over 50,000 registered functions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
