HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, handling approximately 1,500 requests per second during peak hours.
- Engineered efficient **SQL queries** and database procedures across **PostgreSQL** and **Oracle** for complex data retrieval and manipulation tasks, supporting critical operational reporting.
- Automated recurring data processing and reporting tasks using **Python scripting**, reducing manual effort by an estimated 15 hours per week for the operations team.
- Implemented and managed **CI/CD pipelines** using **Jenkins** and **Git** for automated builds, testing, and deployments of Java applications.
- Containerised microservices using **Docker**, enabling consistent development and deployment environments across development, testing, and production.
- Analyzed and resolved production incidents for enterprise applications, maintaining service level agreements (SLAs) through proactive monitoring with **Splunk** and **Dynatrace**.
- Contributed to the design and implementation of a serverless backend service using **AWS Lambda** and **Python** to process event-driven data streams.

SKILLS

Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks/Libraries – Spring Boot, Spring, Hibernate, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence

Analytics/BI – Power BI, Tableau, DAX, Power Query, R, RStudio

PROJECTS

Serverless Data Processing Pipeline (AWS Lambda)

- Designed and built a scalable data ingestion and transformation pipeline using **AWS Lambda** and **Python** to process real-time event streams from various sources.
- Implemented error handling and logging mechanisms within the Lambda functions to ensure data integrity and provide detailed operational insights.
- Integrated the serverless pipeline with **S3** for data storage and **CloudWatch** for monitoring and alerting on processing anomalies.

Java REST API for System Integration

- Developed a **Java Spring Boot**-based RESTful API to facilitate data exchange and integration between disparate enterprise systems.
- Implemented robust data validation and error handling for incoming API requests, ensuring data consistency across integrated platforms.
- Deployed the microservice using **Docker** containers on an **AWS EC2** instance, managing configurations via environment variables.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
