HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** microservices for backend systems, implementing **REST APIs** with comprehensive error handling and JSON payloads.
- Engineered **Hibernate** and **JPA** persistence layers for enterprise applications, optimizing **SQL** queries against **PostgreSQL** and managing complex object-relational mappings for over 5,000 entities.
- Wrote and executed **JUnit** and **Mockito** tests for Java components, achieving an average of **85% code coverage** for new feature development and ensuring adherence to defined design patterns.
- Contributed to the design and implementation of distributed software solutions within a **cloud-native architecture**, focusing on reliability and scalability.
- Collaborated with cross-functional teams to understand requirements for network fabric engineering, sharing technical insights and ensuring alignment with broader system goals.
- Mentored junior engineers on the team through pair programming sessions and constructive code reviews, improving overall team code quality and development velocity.
- Containerized microservices using **Docker** and managed deployments to **AWS EC2** instances, configuring basic resource limits and network policies to ensure predictable performance.

SKILLS

Languages – Java, Python, SQL, Shell Scripting

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Linux

Concepts – Distributed Systems, REST APIs, Microservices, CI/CD, Agile methodologies, Object-Oriented Design

PROJECTS

Distributed Java Microservice for Network Monitoring

- Developed a **Java Spring Boot** microservice to ingest and process network telemetry data, focusing on high-throughput event handling.
- Implemented a **JPA** data access layer to persist network status updates in a **PostgreSQL** database, supporting over 500 concurrent connections.
- Designed and deployed the service as a **Docker** container on **AWS EC2**, integrating with **Jenkins** for automated build and deployment pipelines.

Python-Based Network Performance Analysis Tool

- Created a **Python** script utilizing **pandas** and **NumPy** to analyze network performance logs, identifying latency patterns and packet loss trends.
- Built a command-line interface for the script, allowing operations teams to easily run custom reports on network traffic data from **S3** buckets.
- Generated visualizations of performance metrics using Matplotlib, aiding in the identification of bottlenecks and informing network optimization efforts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
