HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained near-real-time probing and telemetry processing infrastructure for a global network, processing billions of measurements to identify performance degradations within seconds.
- Designed and implemented automated remediation workflows that pinpointed network issues and initiated corrective actions, ensuring uninterrupted customer access to AWS services.
- Collaborated with cross-functional teams including operations and network design engineers to deliver high standards of accuracy, speed, and reliability for network monitoring systems.
- Contributed to the architecture and design of new and existing systems, focusing on reliability and scaling to meet the demands of Amazon's global network.
- Wrote and reviewed code in **Java**, applying object-oriented design principles to build robust network monitoring components.
- Participated in agile ceremonies, including sprint planning and technical estimation, to deliver incremental improvements to network observability tools.
- Containerized network monitoring services using **Docker** and deployed them to **AWS EC2** instances, ensuring consistent environments across development and production.

SKILLS

Languages – Java, Python, SQL, C++

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Networking Concepts – Network Monitoring, Telemetry Processing, Network Performance, Network Availability, Distributed Systems, Observability

Development Tools – Docker, Git, Jenkins, Jira, Confluence

Databases – PostgreSQL, MySQL, Oracle

Methodologies – Agile, Scrum, Object-Oriented Design

PROJECTS

Global Network Telemetry Processing System

- Engineered a high-throughput telemetry processing pipeline using **Java** and **Spring Boot** to ingest and analyze network performance metrics from millions of devices.
- Implemented robust error handling and data validation mechanisms, reducing data loss by an estimated 15% across the system.
- Designed REST APIs for querying processed network data, facilitating integration with downstream diagnostic and remediation services.

Automated Network Anomaly Detection Service

- Developed a Python-based service that analyzed network traffic patterns using **pandas** and **NumPy** to detect anomalies indicative of performance degradation.
- Integrated the service with **AWS CloudWatch** for real-time metric collection and alerting, reducing manual monitoring effort by approximately 30%.
- Created shell scripts for automated deployment and configuration management on Linux servers, ensuring consistent operational environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
