PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices for core platform features, handling approximately 5,000 requests per minute.
- Implemented a **JPA** persistence layer for financial transaction data, ensuring data integrity across multiple database entities and reducing query complexity by **40%**.
- Designed and shipped **REST APIs** for cross-service communication, incorporating robust error handling and request validation patterns to improve system reliability.
- Contributed to the development of runtime environments for multiple languages (Python, Node.js, Java) within the serverless compute platform, ensuring compatibility and performance.
- Participated in **code reviews** and technical design discussions, providing constructive feedback to junior engineers and improving overall code quality.
- Managed the full software development lifecycle for new runtime features, including **sprint planning**, technical estimation, and ensuring timely delivery within Agile frameworks.
- Containerized runtime components using **Docker** and deployed them to a managed Kubernetes environment on **AWS**, configuring resource limits and basic scaling policies.

SKILLS

Languages – Java, Python, Node.js, Go, Rust

Frameworks/Libraries – Spring Boot, Spring Cloud, JPA, Hibernate, JUnit, Mockito, FastAPI, Flask, pandas, NumPy, scikit-learn

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Observability/Tools – Splunk, Dynatrace, Jira, Confluence

Data Analytics/BI – Power BI, Tableau, DAX, Power Query, R, RStudio

PROJECTS

Serverless Runtime Environment Management (HCL Technologies)

- Engineered runtime environments for **Python** and **Node.js** serverless functions, integrating custom build processes and dependency management systems.
- Developed automated testing suites using **JUnit** and Mockito to validate runtime behavior across different language versions, achieving **95%** test coverage for critical paths.
- Containerized runtime applications using **Docker**, facilitating consistent deployment across development, staging, and production environments on **AWS**.

Enterprise Data Pipeline Orchestration (HCL Technologies)

- Built and optimized **Python** data pipelines for ETL processes, transforming data from relational databases into a format suitable for operational dashboards.
- Implemented data validation checks and error handling within the pipelines using **pandas**, reducing data discrepancies reported by downstream teams by **30%**.
- Scheduled and monitored pipeline execution using **cron jobs** and shell scripting on Linux servers, ensuring reliable data delivery for daily reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
