HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed, implemented, and deployed **Java Spring Boot** microservices for core platform features, improving system responsiveness by **18%**.
- Developed and maintained **Hibernate** ORM mappings and optimized **SQL** queries across **PostgreSQL** and **MySQL** databases, reducing data retrieval times by approximately **22%**.
- Authored **JUnit** and **Mockito** tests for new Java components, achieving over **90%** code coverage for critical business logic.
- Collaborated with network engineers to define and implement technical requirements for traffic management features, ensuring alignment with global infrastructure needs.
- Participated in **code reviews** and architectural discussions, providing constructive feedback and mentoring junior engineers on best practices.
- Contributed to the on-call rotation, responding to and resolving production incidents for a critical global networking service within defined SLAs.
- Containerised microservices using **Docker** and deployed them to an **AWS EKS** cluster, managing configurations and basic resource allocation.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks/Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI

Cloud/Infra – AWS (EC2, S3, Lambda, CloudWatch, EKS), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Linux

Analytics/BI – Power BI, Tableau, DAX, Power Query, RStudio

PROJECTS

Distributed Traffic Shifting Service

- Engineered a **Java Spring Boot** service to manage traffic flow across a distributed network, processing over **1,500** traffic drain requests per hour.
- Implemented fault-tolerant mechanisms and state management using **PostgreSQL** to ensure service resilience during network events.
- Developed RESTful APIs for integration with network monitoring tools and configuration management systems.

Network Device Configuration Management Platform

- Developed automation scripts in **Python** to manage and deploy configurations to thousands of network devices across multiple AWS regions.
- Integrated with **AWS S3** for storing configuration templates and audit logs, ensuring version control and compliance.
- Designed a CLI tool for simplified interaction with the configuration deployment service, used by network operations teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
