HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** RESTful APIs for enterprise systems, handling approximately 500 requests per minute during peak hours.
- Engineered and deployed **Python ETL pipelines** to automate data ingestion and transformation processes, reducing manual effort by 40% for reporting tasks.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace** for monitoring and alert analysis, resolving P1/P2 incidents within defined SLAs.
- Contributed to the design and implementation of **AWS Lambda** functions for event-driven processing, integrating with **S3** for data storage and retrieval.
- Participated in code reviews and sprint planning sessions, providing technical estimations and ensuring adherence to Agile methodologies for feature development.
- Containerized applications using **Docker**, facilitating consistent deployment across development, staging, and production environments.
- Automated routine system administration tasks on **Linux** environments through shell scripting and cron jobs, improving operational efficiency.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

Methodologies – Agile, Scrum

PROJECTS

Cloud Operations Automation Suite

- Developed a suite of **Python** scripts to automate common AWS operations tasks, including EC2 instance management and S3 bucket configuration, reducing manual intervention by approximately 30%.
- Integrated monitoring alerts from **CloudWatch** into a custom notification system to streamline incident response workflows for the operations team.
- Containerized the automation tools using **Docker** for easier deployment and management across different AWS environments.

Enterprise System Integration Framework

- Designed and implemented a **Java Spring Boot**-based framework to facilitate REST API integrations between disparate enterprise systems, enhancing data flow efficiency.
- Developed data validation and error handling mechanisms for API requests and responses, ensuring data integrity across interconnected services.
- Collaborated with business analysts to gather requirements for system integrations, translating them into technical specifications for the development team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
