PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices to handle inbound API requests for enterprise applications, managing a traffic volume of approximately **1,500 requests per minute**.
- Designed and implemented **Hibernate** mappings and JPA entities for complex relational data models, ensuring data integrity and efficient querying across multiple tables for financial transaction records.
- Authored **JUnit** and **Mockito** test suites for core Java modules, achieving over **85% code coverage** and significantly reducing regression defects in production deployments.
- Contributed to the operational readiness of the European Sovereign Cloud (ESC) by developing **Python** automation scripts for system health checks and incident response, reducing manual intervention time by **20%**.
- Participated in code reviews for new feature development within the ESC Managed Operations team, providing constructive feedback to improve code quality and adherence to **AWS service standards**.
- Collaborated with senior engineers to design and implement monitoring solutions using **AWS CloudWatch** and **Splunk**, enhancing system visibility and alerting for key operational metrics.
- Containerized backend services using **Docker** and managed deployments to **AWS EC2** instances, ensuring consistent environments from development through to production.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git

Operating Systems – Linux

Monitoring & Observability – Splunk, Dynatrace

PROJECTS

HCL: Enterprise Java Application Modernization

- Refactored a monolithic Java application into a suite of **Spring Boot microservices**, improving modularity and enabling independent deployment cycles for different functional areas.
- Implemented **Hibernate** for data persistence, optimizing critical queries that reduced average data retrieval times by **30%** for core business reporting functions.
- Developed RESTful APIs to facilitate inter-service communication, ensuring seamless integration with existing enterprise systems and downstream applications.

HCL: Python-Automated Financial Reporting Pipeline

- Designed and built an automated reporting pipeline using **Python** and **pandas** to aggregate data from multiple PostgreSQL databases, generating daily operational summaries for a financial services client.
- Developed scheduled jobs using cron on Linux to execute the Python scripts, delivering reports consistently by **8 AM daily** and improving data availability for operations teams.
- Integrated data validation checks within the pipeline to ensure accuracy, flagging approximately **50-70 data anomalies** per week before report generation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
