PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** REST APIs for cross-service data exchange, implementing request validation and circuit-breaker patterns to enhance system resilience for enterprise customers.
- Engineered **Python** scripts to automate data ingestion and transformation, building ETL pipelines that processed approximately 15,000 records daily for scheduled reporting tasks.
- Managed production environments for enterprise applications, conducting **Splunk** and **Dynatrace** analysis to identify performance bottlenecks and resolve P1/P2 incidents within defined SLAs.
- Designed and implemented automated testing suites using **JUnit** and **Mockito** for Java applications, achieving over 90% code coverage for critical modules and reducing regression defects by **22%**.
- Contributed to the operational health of AWS services by analyzing logs, identifying anomalies, and creating actionable bug reports to improve system efficiency and performance.
- Participated in change management processes, providing feedback on documentation and actively addressing the team's operational backlog to ensure seamless system functionality.
- Containerized multiple Java applications using **Docker** and deployed them onto an **AWS EC2** instance, configuring basic resource limits to ensure predictable performance during peak loads.

SKILLS

Cloud Platforms – AWS, EC2, S3, Lambda, CloudWatch

Languages – Java, Python, SQL, R, English

Frameworks & Libraries – Spring Boot, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git, Jira, Confluence

Monitoring & Observability – Splunk, Dynatrace

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling

PROJECTS

Automated Data Processing Pipeline for Financial Operations

- Developed a **Python**-based ETL pipeline to ingest and transform transaction data from multiple sources, handling approximately **3,200** failed payment messages per week.
- Implemented robust error handling and logging mechanisms using **PostgreSQL** and **SQL**, ensuring data integrity and providing audit trails for critical financial operations.
- Created automated reports summarizing daily processing volumes and identified anomalies, which were then used by operations teams to streamline reconciliation workflows.

Cloud-Native Application Deployment on AWS

- Containerized a **Java Spring Boot** microservice using **Docker**, facilitating consistent deployment across development and production environments.
- Configured and managed application deployments on **AWS EC2** instances, integrating with **AWS CloudWatch** for real-time monitoring and basic alerting on key performance indicators.
- Established a CI/CD workflow using **Jenkins** and **Git**, automating build, test, and deployment processes to reduce deployment cycle time by **30%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
