HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** scripts to automate routine operational tasks, reducing manual intervention by an estimated **30%** across the support team.
- Managed production support for enterprise **Java** and .NET applications, responding to P1/P2 incidents and ensuring adherence to strict SLAs using **Splunk** and **Dynatrace**.
- Developed and maintained **Java Spring Boot** REST APIs for internal services, focusing on robust error handling and efficient data exchange.
- Contributed to the development of a **payments operations dashboard**, focusing on transaction monitoring and implementing alerting for failed payment messages.
- Wrote and optimized **SQL** queries across PostgreSQL and Oracle databases for data validation and ad-hoc reporting, supporting critical business functions.
- Containerized multiple backend services using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and simplifying environment management.
- Participated in **Agile/Scrum** ceremonies, including sprint planning and daily stand-ups, contributing to defect tracking and feature development using **Jira** and **Confluence**.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Python, Java, SQL, Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux, SIP, VoIP

Domain Knowledge – Telecom Operations, Call Center Platforms, Systems Engineering, Site Reliability Engineering (SRE), DevOps

PROJECTS

Telecom Infrastructure Automation Suite (HCL Technologies)

- Developed a suite of **Python** scripts to automate the provisioning and configuration of **SIP/VoIP** infrastructure components, reducing deployment time for new carrier integrations by approximately **40%**.
- Created **Bash** shell scripts for automated log analysis and system health checks on Linux servers, enabling proactive identification of potential issues within the telecom backend.
- Integrated automation scripts with **Jenkins** pipelines for continuous integration and deployment of infrastructure configurations, ensuring consistent and repeatable deployments.

Call Flow Monitoring and Alerting System (HCL Technologies)

- Engineered a **Java Spring Boot** application that monitored real-time call flows within a contact center platform, parsing **SIP** messages to track call status and agent availability.
- Implemented custom alerting mechanisms based on predefined thresholds for call queue lengths and dropped calls, using **AWS CloudWatch** to aggregate metrics and trigger notifications.
- Designed and maintained the **PostgreSQL** database schema to store historical call data and performance metrics for later analysis and reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
