PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **fire suppression systems** for a regional infrastructure delivery programme, integrating water mist and clean agent technologies.
- Collaborated with cross-functional teams, including architects and electrical engineers, to develop and implement **fire safety solutions** for mission-critical facilities.
- Reviewed and ensured compliance with international and regional **fire protection standards**, translating complex requirements into actionable design specifications.
- Provided technical guidance on **fire protection engineering** matters, including hazard analysis and risk assessment for new facility designs.
- Supported continuous improvement of design standards and methodologies by researching new **fire protection technologies** and construction methods.
- Contributed to the commissioning process for critical facility systems, verifying the functionality and performance of installed **fire protection equipment**.
- Containerized core application services with **Docker** and deployed them to a Kubernetes cluster (EKS), wiring up Helm chart configuration and basic resource limits for predictable rollout.

SKILLS

Fire Protection Engineering – Fire suppression systems, Hazard analysis, Risk assessment, Fire safety solutions, Design standards

Data Center Engineering – Mission critical facilities, Data center design, Facility engineering

Compliance & Standards – International fire protection standards, Building codes and regulations

Design & Development – Construction methods, Design concepts, Specifications, Submittal documents

Cloud & Containerization – Docker, Kubernetes, AWS (EKS), Helm

Commissioning – System commissioning, Equipment performance verification

PROJECTS

Data Center Fire Safety System Design

- Developed detailed design specifications for **fire suppression systems**, including sprinkler, clean agent, and detection systems, for a large-scale data center.
- Performed hydraulic calculations and fire modeling to validate system performance against **international fire protection standards** and internal AWS requirements.
- Collaborated with site operations and construction teams to ensure accurate implementation of the designed **fire safety solutions** during build-out.

Critical Facility Engineering Standards Update

- Researched and evaluated emerging **fire protection technologies** and construction methods applicable to mission-critical facilities.
- Contributed to the revision of internal design guidelines, focusing on enhancing the reliability and effectiveness of **fire safety solutions**.
- Authored technical documentation on new system integrations and their compliance with relevant **building codes and regulations**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
