HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices for backend systems, managing request processing and data persistence with **JPA** and **Hibernate**, handling approximately 1,500 requests per minute.
- Designed and implemented a **Java EE** application component adhering to **design patterns**, including comprehensive unit tests using **JUnit** and **Mockito**, achieving over 90% code coverage.
- Engineered **Python** scripts for automating data extraction and transformation from disparate sources into a centralized data warehouse, improving report generation efficiency by **40%**.
- Collaborated with cross-functional teams to design, build, and operate innovative products and services, participating in technical discussions to drive solutions forward.
- Contributed to the design and development of scalable, reliable services with distributed-systems scope, breaking down complex problems into well-defined components.
- Conducted code reviews as a core engineering practice, providing constructive feedback and validating correctness to ensure code quality and maintainability.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, integrating with **Jenkins** for CI/CD pipelines.

SKILLS

Programming Languages – Java, Python, SQL, R, TypeScript

Frameworks & Libraries – Spring Boot, Spring, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio

Methodologies – Agile, Scrum, CI/CD, SDLC

PROJECTS

Enterprise Java Backend Service Modernization

- Refactored a legacy Java service into a modern **Spring Boot** microservice, enhancing performance and maintainability for core business logic.
- Integrated **Hibernate** and **JPA** for robust data access layer management, improving database interaction efficiency and reducing query complexity.
- Implemented RESTful APIs to support new feature integrations, processing an average of 1,200 requests per hour during peak usage.

Automated Reporting Pipeline with Python

- Developed a **Python**-based ETL pipeline to ingest data from multiple databases, transforming and loading it into a data warehouse for analytical reporting.
- Created automated scheduled reports using **pandas** and generated visualizations to highlight key performance indicators for stakeholders.
- Reduced manual data compilation effort by approximately **30 hours** per month through script automation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
