HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and implemented **Java Spring Boot** microservices to manage runtime configurations and deployment artifacts for **AWS Lambda**, processing over 5,000 configuration updates daily.
- Developed and maintained **Python** scripts for automating the build, test, and deployment pipelines of managed language runtimes, reducing manual intervention by approximately **40%**.
- Optimized **SQL** queries and database schemas in **PostgreSQL** for storing and retrieving runtime metadata, improving data retrieval performance by **30%** for critical operational dashboards.
- Participated in code reviews for new language runtime features, ensuring adherence to coding standards and best practices for a team of 8 engineers.
- Collaborated with product management and customer support teams to define requirements for new runtime features and address critical customer-reported issues, leading to a **15%** improvement in customer satisfaction scores for runtime stability.
- Contributed to the design and implementation of **container image** build processes, ensuring compatibility with the Lambda execution environment and reducing image build times by **20%**.
- Managed and resolved P1/P2 incidents within strict SLA targets for enterprise applications, performing root cause analysis using **Splunk** and **Dynatrace**, and coordinating cross-team efforts for resolution.

SKILLS

Cloud Platforms – AWS, EC2, S3, Lambda, CloudWatch

Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Kubernetes, FastAPI

Concepts – REST APIs, Microservices, CI/CD, Agile Methodologies, Production Support, Incident Response, Data Pipelines, ETL

PROJECTS

AWS Lambda Runtime Management Service

- Developed a **Java Spring Boot** application to manage the lifecycle of managed runtimes, including patching, versioning, and deprecation, supporting over 10 different language runtimes.
- Implemented RESTful APIs for runtime configuration updates and status monitoring, integrating with internal AWS services and reducing manual deployment steps by **50%**.
- Wrote comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving **90%** code coverage for critical runtime management modules.

Automated Language Runtime Build and Test Pipeline

- Engineered a **Python**-based CI/CD pipeline using **Jenkins** and **Git** to automate the build, test, and packaging of new language runtime versions for **AWS Lambda**.
- Integrated static analysis and security scanning tools into the pipeline, identifying and resolving over **150** potential code vulnerabilities before deployment.
- Containerized the build environment using **Docker**, ensuring consistent and reproducible build outcomes across development and production stages.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
